

## Fluorescent Compact PL/PLC Lamps

This extensive range of compact fluorescent lamps offers the same benefits of standard fluorescent tubes with the advantage that their compact size makes them suitable for use in shallow or miniature luminaires. Like standard fluorescent tubes these lamps can only be used in luminaires with an appropriate lamp holder and ballast

### Features

- Compact size makes them suitable for use in a variety of applications where incandescent or discharge light sources were traditionally used
- Large range of colour temperatures and wattages available
- High quality, long life, energy saving lamps
- Manufactured to Australian Standard AS/ NZS 60901 :2003

### Applications

- For commercial applications where a compact, energy saving and efficient light source is required
- Ideal for downlights and wall lights in office buildings, foyers and hotels
- Suitable for indoor use or in protected exterior applications

### Burning Position

- Universal
