

PHOTOELECTRIC SMOKE ALARMS

BETTER PROTECTED WITH INTERCONNECTED

Stay alert and save lives with early fire detection with Legrand's interconnectable photoelectric smoke alarms.

Photoelectric smoke alarms detect visible combustion particles alerting occupants early to smouldering fires and dense smoke, allowing adequate time to escape to safety.

INTERCONNECTED

No matter where you are or where the fire starts, you'll be alerted with interconnected.

Interconnected smoke alarms provide the best protection for alerting occupants to fires, as when one smoke alarm sounds, all interconnected alarms sound simultaneously.

RADIO FREQUENCY (RF) WIRELESS INTERCONNECTABLE

RF technology utilises a radio transmitter, which eliminates the need to run interconnect wires between multiple floors and rooms in your home, allowing for a wireless interconnectable installation that's flexible and more cost effective.
