Anti-Slippery Lift

MECHA-LIKE SWITCH

Innovative patented Mecha-Like Switch is derived from LK(Light Strike) Switch's Mechanism, it provides the clicky tactile feedback of mechanical key press on a comfortable, soft cushioned rubber dome. It provides about 95% similar typing experience as typing on LK switch mechanical keyboard.

5-ZONE NEON BACKLIGHT

Glow with 7-color backlight, illuminate your gaming vibes and bring your game to the next level!

Adjustable Backlights

Lighting Effects: FN + F12
Brightness: FN + "↑ / ↓" (10-Level Adjustable Brightness)
Speed: FN + "= / ." (Wave / Breathing)

Centered Backlight Design

LED emits through the center of each key emitting evenly through each key.

1ms Key Response

Instantaneous execution is guaranteed with the 1000Hz ultrapolling technology, giving you a response time of ultra-fast 1ms.

Dependable Durability

Electronically sealed circuits are paired with drainage paths for a stronger durability to splashes and spills.

Game Mode

Press Fn+F8 will disable "Window" keys to avoid interruption during the game session.

1000 Hz

1000 Hz Report Rate

1000 Hz full report rate provides faster and timely feedback.

Anti-Slippery Keyboard Lift

Anti-slippery lift prevents keyboard from moving or vibrating during game session.
