

Caravan Ready Products

The Hippo Caravan inlets and outlets are ready for all Australian conditions of both sun and rain where installations are exposed to a variety of tough environments.

Available Now through your Electrical Wholesaler

Trader's Hippo series of weatherproof auto switched sockets (power points) and inlets are designed for Australia's tough climatic conditions. They are particularly ideal for caravans or for accessing power from exteriors of relocatable buildings.

Key features include:

HIPPO CARAVAN READY PRODUCTS

- The HPPP1GAU series has a socket that switches on when the plug is inserted.
- The flap on the HPAI and HPPP1GAU series is designed to be able to close over standard plugs from extension cords and provide an adequate weather protection rating to IP34.
- Terminals are suited for 1.5mm² or 2.5mm² cables [HPAI]
- Terminals are suited for up to 2 x 2.5mm² cables [HPPP1GAU, HPPP151GAU]
- HPAI is rated at 15A 250V ~ to provide adequate power input capability to cover accessories and equipment used in most portable dwellings.
- HPPP1GAU models are rated at either 10A or 15A 250V ~ and are double pole to provide adequate power required from most portable dwellings.
- UV stabilised polycarbonate to resist yellowing from sunlight.
- Standard colour is White. Also available in Black - please check availability.
