

Product Data Sheet

High Voltage Wall Mounted Rescue Kit - Volt Safety

High Voltage Switchboard Wall Mounted Rescue Kit made by Volt Safety is a must-have kit for businesses that require a dedicated rescue kit on-site. The kit is mounted near the switchboard and designed to be used by the safety observer in the event of on-site electrical shock. It enables the safety observer to safely perform rescue from a live switchboard panel without being electrically shocked.

NB The insulated gloves supplied in this kit are required to come in size 11 to ensure the gloves can fit different safety observers. The gloves are stamped 'RESCUE USE ONLY' to state that they should *not* be used as everyday working gloves, as the gloves need to be suitable for purpose in the event that a rescue is required.

Key Features:

- Conforms to the requirements of Australian energy providers
- Ensures that there is always a High Voltage Rescue kit available on-site
- Kit Size: 37cm width x 45cm height x 21cm depth
- Brightly coloured box to ensure kit is easily found in dark environments
- Straps inside the box to ensure contents stay in order
- Comes with 4 strong mounting bolts
- Durable, heavy duty box

SKU/Part #	Voltage Rating
KIT-HVR-WM-1	Class1 7500v
KIT-HVR-WM-2	Class2 17000v
KIT-HVR-WM-3	Class3 26500v
KIT-HVR-WM-4	Class4 36000v

Product Data Sheet

- Insulated Rubber Gloves Size 11 Gloves, available in multiple classes
- Multi-Trauma Burns Dressing opens up to 75cm x 75cm
