

LIFESAVER

MINI SMOKE ALARM

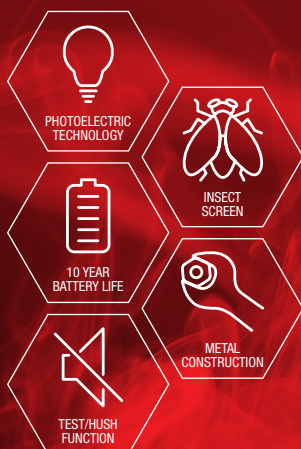

MODEL LIFPE10

Introducing our smallest battery operated smoke alarm in the PSA Lifesaver range. The Lifesaver model LIFPE10 mini smoke alarm. Measuring only 70mm in diameter and 33mm high, this modern smoke alarm is aesthetically pleasing without compromising on safety. The LIFPE10 is powered by a non-replaceable sealed 10 year lithium battery. Peace of mind protection and never needing to change the battery.

Photoelectric design to detect the widest range of fires, it does not contain any radioactive element. The LIFPE10 is made from quality stainless steel casing and a metal net to protect against small insects from activating the smoke alarm. This smoke alarm comes with a convenient easy to use Test and Hush function. Pressing Test will test the function of the smoke alarm. Pressing Hush will desensitise the smoke alarm to nuisance alarm for 10 minutes. A red LED indicator and audible beep for status. A loud 85dB alarm at 3m will ensure occupants are alerted of a fire. A smart low battery pause feature will hush low battery beeping for 10 hours allowing you to change the smoke alarm the next day.

The LIFPE10 comes complete with mounting screws and plugs. And for additional convenience a double sided sticker.

The PSA Lifesaver LIFPE10 is Tested and Complies to the latest Australian Standard AS3786:2014.
