

## CABLE LOCATOR

The MT195 Cable Locator is the ideal tool to detect electrical power cables, communication cables, metal pipes and much more during construction, maintenance, or renovation. Pinpoint pipes and cables in walls or underground with precision by identifying the corresponding signal number sent by the transmitter. The transmitter and receiver with their advanced digital circuit technologies ensures a highly stable and reliable performance. The transmitter not only sends signals but can be used as an AC/DC voltmeter displaying the voltage on the tested line. When testing on electrical circuits, the receiver can quickly identify circuit breakers in the distribution board of the circuit the transmitter is connected to or visa versa. The receiver displays the value of the signal measured and it can be used to check short circuits or breaks on existing installations, ideal for underfloor heating systems. The MT195 set is lightweight and is supplied with a complete set of accessories for direct measurement.

### Features

- Detects cables, electrical wire, water/gas supply pipelines concealed in walls and ground
- Detects interruptions and short circuits in cables and concealed electrical wire
- Tracing sockets and distribution sockets having accidentally been covered by plastering
- The transmitter measures voltage from 12V to 400V AC/DC
- The screen of transmitter displays preset transmitting power, transmitted codes and voltage
- Transmitter has self-inspection displaying status on LCD
- Both transmitter and receiver have flashlight function
- Output signal 125kHz
- Detects interruptions and short circuits in floor heating
- The LCD of receiver displays preset transmitting power, transmitted codes and voltage
- The sensitivity of the receiver can be adjusted manually or automatically
- The receiver can sweep frequency automatically
- Identifies fuses and assigned current circuits
- Mute mode can be set for both the transmitter and receiver
- Auto Power Off
- Additional transmitters are available to extend or verify several functions

MT195T

MT195

Function	Range	Accuracy
<b>Transmitter</b>		
Output signal	125 kHz	
External Voltage Range	12V to 400V DC	±2.0%
	12V to 400V AC	±2.5%
Power consumption	115mA approx.	
Operating Temperature	0°C to +40°C	
Operating Humidity	20% to 60% RH	
Size	190 x 89 x 43mm	
Weight	420g	
<b>Receiver</b>		
Cable locating mode	0 to 2 meters (Single pole application) 0 to 0.5 meters (Dual pole application) 0 to 2.5 meters (Single loop line)	
Grid Voltage Identification	0 to 0.4 meters approx.	
Power consumption	32mA (Min current), 89mA (Max current)	
Operating Temperature	0°C to +40°C	
Operating Humidity	20% to 60% RH	
Size	242 x 78 x 39mm	
Weight	350g	

## CABLE IDENTIFIER

The MT915 is an amazing tracing system which will save hours instead of Belling-Out any circuit. The MT915 consists of a transmitter & receiver device which enables one person to instantly match up ends of individual cores at either end of a multi-core cable. With the remote kit the meter can test cables installed over long distances either on wall plates or patch panels. The DMM function makes it easy to measure AC Volts, DC Volts, AC and DC Current, Resistance, Continuity and Diode Test.

### Features

- Identifies up to 16 cables
- Cuts out "Bell-Out" time
- Cable Resistance 30kΩ max
- Digital multimeter
- 600V AC/DC
- 200mA AC/DC
- Resistance 20MΩ
- Diode Check
- 2000 Count LCD
- Continuity

Function	Range	Accuracy
DC Voltage	600V	±(1.0% +3)
AC Voltage	600V	±(1.0% +5)
DC Current	200.0mA	±(1.5% +3)
AC Current	200.0mA	±(1.8% +8)
Resistance	20MΩ	±(1.2% +3)
Size	162 x 74 x 43 mm	
Weight	308g
