

## CAT6 Data Mech White

| Configuration                            |                              |
|--|------------------------------|
| - cat.6                                  |                              |
| Frequency                                |                              |
| Transmission bandwidth                   | max. 250 MHz                 |
| Resistance                               |                              |
| Signal contact resistance                | < 20 m?                      |
| Insulation resistance                    | min. 500 M? at 100 VDC       |
| Measurement                              |                              |
| Relative humidity (without condensation) | 10 90 %                      |
| Materials                                |                              |
| Colour                                   | white                        |
| Colour code A and B                      | according to TIA/EIA-568-C.2 |
| Colour                                   | white                        |
| Material housing                         | PC UL94V-0                   |
| Surface appearance                       | glossy                       |
| Dimensions                               |                              |
| Width                                    | 27 mm                        |
| Installation, mounting                   |                              |
| - RotoLoc ®                              |                              |
| Safety                                   |                              |
| Protection index IP                      | IP20                         |
| Use conditions                           |                              |
| Operating temperature                    | -10 60 °C                    |
| Identification                           |                              |
| Main design line                         | Mechanisms                   |
|  |                              |
