LIFPE10LP SMOKE ALARM

Low Profile Lithium (non-replaceable) Battery-Operated Photoelectric Smoke Alarm

Award-winning Design

This smoke alarm has been championed as a Red Dot Award winner whereby the best products are awarded for being aesthetically pleasing, functional, smart or innovative and are united by their outstanding design quality.

Low Profile

Modern and slimline design. Small footprint measuring at 115mm x 23mm.

Powered by 10-year Lithium Battery

A built-in non-replaceable battery ensures peace of mind for the life of the smoke alarm.

Photoelectric Sensing Technology

To detect a wide range of fires particularly to slow smouldering fires and does not contain any radio-active material.

Bug Screen Sensor Chamber Protection

Small diameter bug screen over the sensor chamber to minimise insect ingress and reduce false alarms.

Large and Simple to Use Test & Hush Button

Easy to operate single button on the smoke alarm. The whole alarm cover is a button and allows for simple user operation.

Certified

The Lifesaver LIFPE10LP is proudly manufactured by a Quality Certified factory and has been tested and approved to AS3786:2014.

Application

Can be installed on the ceiling or wall. Perfect for homes, caravans and bedrooms for additional protection.
