

theben 100 YEARS building automation

1921

Our entire story starts in 1921 with the introduction of the first swivel time switch for staircases – developed by company founder Paul Schwenk to stop lights in staircases being left on all the time. And so Theben's first ever energy-saving product is born.

1928

"Use well the precious time, it flips away so!" In 1928, Paul Schwenk has this quote from Goethe's Faust put up on display in the reception area of the company building at Reinsburgstraße 103 in Stuttgart. 30 employees are based here on five floors, where they produce staircase timers and time switches.

1941

Paul Schwenk is a democrat through and through, and is opposed to the Third Reich. To escape the attentions of the Gestapo in Stuttgart, he looks for a suitable house in the country. He strikes gold in Haigerloch. The former Rose restaurant undergoes an extensive conversion to become the new company headquarters.

1930

The first ELPA automatic time switch with pendulum and mercury tube contact goes into mass production. This marks the beginning of an incredible success story: more than 30 million units are sold, making the ELPA synonymous with staircase light timer switches. A lot of rumours have grown up around this name since then: Are those the initials of his two children, Ellen and Paul? Or is it the abbreviation for "Electrical pendulum automatic device"?

1944

Paul Schwenk falls seriously ill in the autumn of 1943 and passes away in March 1944. The company is managed by engineer W. Schröder and by Wilhelm Weckerle until the founder's son, Paul Eberhard Schwenk, takes charge in April 1945.

1971

1971 provides lots of reasons to celebrate. Firstly, the company can look back proudly on 50 successful years and, secondly, the figures indicate a bright future ahead: an annual turnover of DM 18 million is generated by 360 employees and more than 300,000 time switches are sold in over 50 countries.

1948

Following the currency reform of autumn 1948, Paul Eberhard Schwenk starts rebuilding the company.

The family-run business quickly picks up again. Orders flow in and new faces, such as the future managing director Werner Herl, join the established workforce.

1977

Theben files the patent for its "rotary switching disc", which can be used in analogue time switches and clock thermostats (such as the RAMSES 782) for direct changeover between daily and weekly programs. A patent for the "socket timer" is filed in the same year (more than 30 million units have been sold to date).

1958

The Haus Rose (a converted restaurant) gradually runs out of space and so, in 1958, work starts on a new building on Hohenbergstraße. The component production areas (press, drilling and turning shops) move in first, followed by other production areas once the new building has been extended. By 1970, the entire Theben workforce is finally accommodated under one roof in the large and modern complex on Hohenbergstraße.

1971

The founding of PEZET GmbH (a subsidiary company for die and plastics technology based at the Madertal industrial estate) leads to further expansion of production at the headquarters in Haigerloch. In addition, Theben S.a.r.l. – the company's first international distribution company – is established in France.

1992

It has been almost 30 years since Theben began collaborating on the development of EIB technology (now KNX) and started manufacturing the first BUS-capable time switches and twilight switches. We have been a member of the KNX Association since 1995, working in conjunction with other leading manufacturers to make KNX a world-wide standard.

1983

In 1983, Theben launches its first digital time switch, the TERMINA 1000: 2.2 kg of high technology lies behind the white housing measuring 257 x 128 mm. It quickly becomes a lot smaller: 1984 sees the introduction of the TR 611, which is just 35 mm wide, has only six buttons and is very easy to use.

1999

The new production building is constructed on the Maderal industrial estate in Haigerloch and the whole of production is relocated there from Hohenbergstraße. With a floor space of more than 6000 m², the new facility is responsible for producing time switches, room and clock thermostats, and KNX components. The headquarters now boast a total floor space of over 25,000 m².

1994

Theben launches the LUXOR living comfort control. This system is to be regarded as "The mother of all smart home systems" and offers a whole host of handy and convenient functions: scenes, presence simulation, central OFF. And you don't even need a smartphone! It is programmed by adjusting potentiometers with a screwdriver.

1992

Theben founds a subsidiary in Italy, thereby expanding its influence in Southern Europe for the long term. With its many users, Theben S.R.L. is now a firmly established supplier of premium products on the Italian wholesale electrical market.

2003

Theben launches the LUXOR living comfort control. This system is to be regarded as "The mother of all smart home systems" and offers a whole host of handy and convenient functions: scenes, presence simulation, central OFF. And you don't even need a smartphone! It is programmed by adjusting potentiometers with a screwdriver.

2007

The takeover of High Technology Systems AG, Switzerland (HTS) – the inventors of the presence detector – leads to Theben (Switzerland) AG becoming Theben HTS AG. As a result, Theben expands its expertise in lighting control considerably.

2017

LUXORliving is essentially KNX without ETS. It offers intuitive programming and really easy operation. And because it is based on KNX, it represents a safe and future-proof investment.

2021

This year, we celebrate 100 years of building automation together. The automation of buildings has been part of our company's DNA right from the start. The aim? – To improve comfort for everyone while reducing energy consumption. Our motto is „Energy at the right time“. Both today and tomorrow.

2016

Paul Sebastian Schwenk, the great-grandson of the company's founder takes up his position on the board on 1 September. Together with company partner Nikolas Herl (Head of Finance and Accounting) and board member Thomas Sell he heads up various f3 projects to get Theben „fit for the future“.

2020

The CONEXA 3.0 Performance Smart Meter Gateway is certified by the German Federal Office for Information Security. With CONEXA, Theben is helping to achieve the energy transition and plenty more besides.

"Energy at the
right time."

Paul Schwenk 1921

Dear customers and partners,

Some companies find the process of figuring out their own DNA to be an arduous and lengthy one. For us, it was always obvious:

Theben is synonymous with building automation. We stand for technologies and products that not only help to reduce energy consumption, but are also safe, secure and easy to operate. We stand for "Energy at the right time". That has long been the case: for 100 years to be precise.

While we are on the subject, Theben will be celebrating its 100th anniversary in 2021 – at a time when things are not exactly easy. We would be delighted to mark the occasion together with you, our loyal customers and reliable partners, live and online. All the information you need can be found on our anniversary website at 100.theben.co.uk

We are not only very proud of our history, but also of the strong position we currently hold as an internationally successful family-run business. The hallmarks that have set us apart throughout our entire 100-year history can also be found in this catalogue: innovative premium products that are designed to take building automation and networking to the next level in a highly efficient way. After all, these are all part of our DNA. Today and in the future.

Building Automation since 1921.

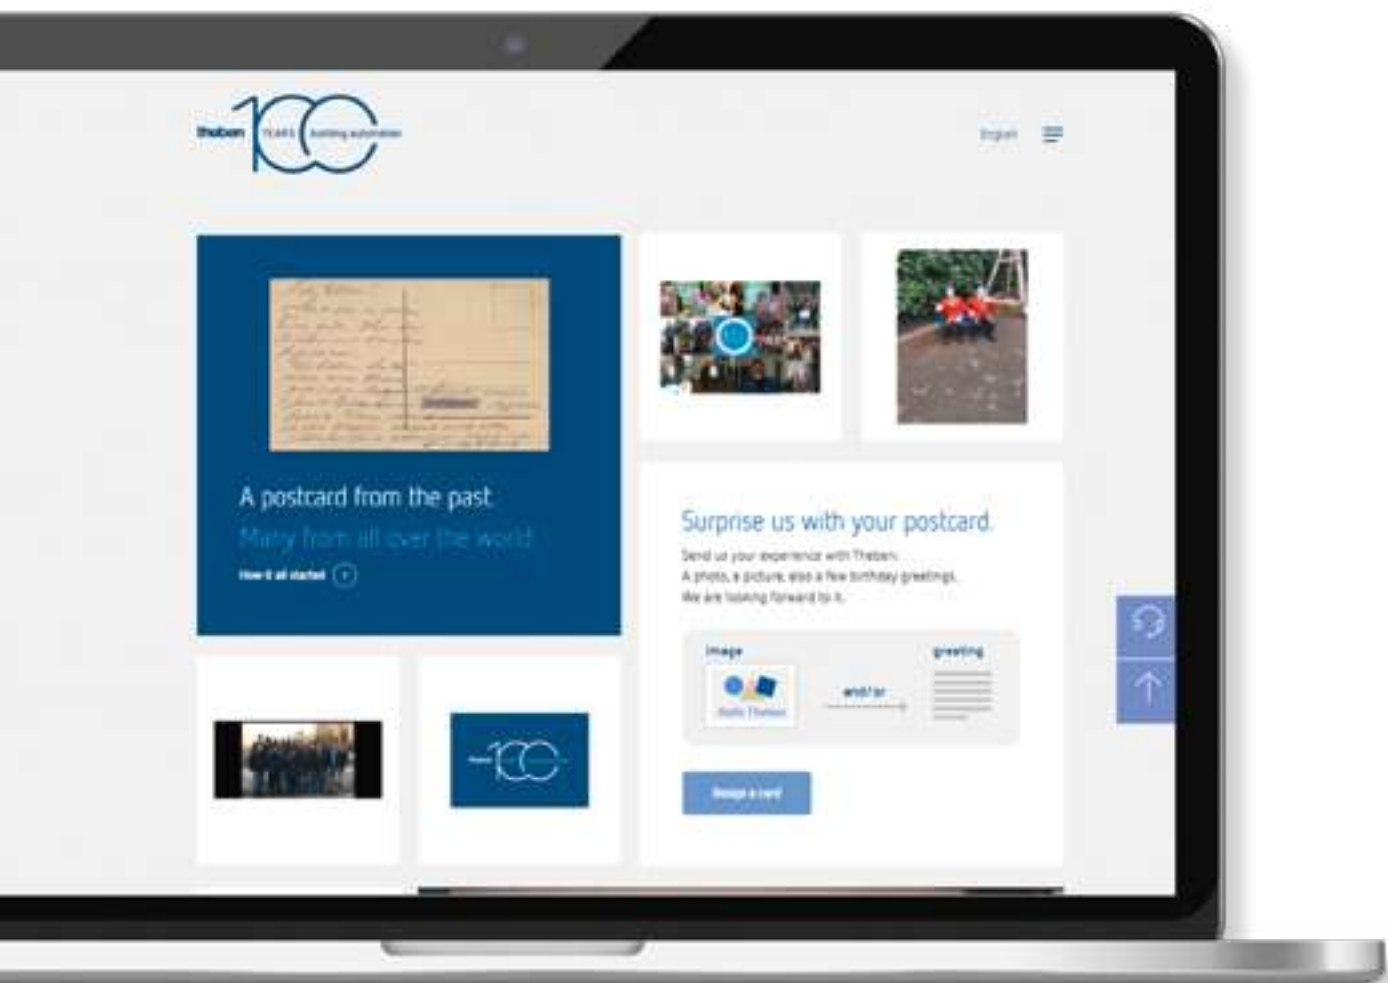

A handwritten signature in blue ink, reading "Paul S. Schwenk". The signature is fluid and cursive.

Paul Sebastian Schwenk
Chairman of the Board of Management

We're interested in you and your story!

We love nice surprises and would be happy to hear from you – whether you are a friend of Theben already or would like to become one, and whether you already have links with the company or would like to forge some. Alternatively, if you just want to congratulate us on our special anniversary, you can write to us at 100.theben.co.uk

The three most original postcards will be singled out and all of them will be entered into a draw and included in our **100 years of building automation** exhibition.

This is how it works:

Go to 100.theben.co.uk

Upload your text and image.

Send off the card and you're done!

LEDs are contact killers

Low consumption during operation, but wasteful during switch-on

A simple scenario: In the staircases of a large residential building, the building management replaces the light bulbs with LED retrofit lamps. A specialist measures and verifies the prescribed brightness. The potential for savings is promising: in addition to the more favourable energy consumption, the long service life should reduce maintenance costs.

But suddenly the staircase light timer switches fail. An examination shows scorched or fused contacts: the devices have obviously been overloaded, although the rated output of the installation was reduced significantly.

Hard work for the contacts Capacitive inrush loads

How can an LED lamp that only has a few watts of rated output destroy a switching contact that has been designed for several times that? Upon closer inspection, the answer is found in the inrush currents: in light bulbs, the cold spiral coil results in inrush currents that are typically ten times the respective rated current. In LED lamps and energy-saving lamps, the capacitive characteristics result in inrush current pulses in the μs range that can be a 1000 times the rated current or even more. At our VDE-approved laboratory, an inrush current of 19 A was measured for a 1.8 W LED lamp under particularly unfavourable conditions – that's 1706 times the rated output!

Watch your step! Switch-off pre-warning

At this point, we also wish to draw attention to problems that can affect the switch-off pre-warning (flashing twice or similar according to DIN 18015-2): users will not necessarily notice the flash, as the electronic ballasts or capacitors of the LEDs continue to supply power during this process. Not only that, but repeated switching impairs the service life of the device.

How to switch LEDs

With the right contact at the right time

10 A–10 AX
230 V~

Two contacts for all switching cases: Tungsten pre-contact

High currents require special contacts. Alongside silver tin oxide (AgSnO_2), Theben uses a combination of two contacts closing one after the other: tungsten pre-contacts. The leading contact consists of high-resistance, extremely durable tungsten.

It captures the inrush current and limits it at the same time. As a result, the low-resistance main contact remains unaffected by the peak inrush currents.

Theben uses these relays in its TR 609 top2 S and SELEKTA 175 top2 digital time switches as well as with the theLuxa P performance motion detectors and the theRonda P presence detector.

Switching at precisely the right time: Zero-cross switching

Switching devices that are designed for the C load generally cope better with the inrush currents. Theben uses a particularly efficient solution, known as zero-cross switching. It calculates the zero-crossing of the alternating voltage sine curve. At this moment, the inrush current is at its minimum during switching. This protects the relay contact and extends its service life, even at nominally high switching loads. Almost all of the devices from the top2 and top3 series include this feature, as do the theLuxa S motion detectors and many other devices as well.

Environmentally aware and safe switching: Cadmium-free contacts

Cadmium oxide was long thought to have been the ideal contact material for high inrush currents. It is now forbidden according to RoHS guidelines, but there are exceptions for electrical switching contacts. Nevertheless, Theben had already switched to environmentally friendly AgSnO_2 materials at the turn of the millennium. These offer comparably good – in some cases even better – contact and switching properties, such as higher burn-off resistance, increased welding resistance and a significantly reduced tendency towards material migration during direct current operation.

Dimming LEDs?

Not something that should be taken for granted!

Dimmable or not? Making the right choice is crucial

Not every LED lamp is dimmable. Even with suitable versions, the dimming characteristics differ significantly and depending on the manufacturer. LEDs frequently flicker and cannot be dimmed linearly and consistently because the required electronic ballasts react with great differences to the leading and trailing edge. This is why some manufacturers explicitly allow only one of the methods.

Residual currents are sufficient to cause unwanted continuous light

Another problem is caused by the interference suppression capacitors of the dimmer. Very low residual currents continuously run through them. These are sufficient to supply LED lamps with one to two watts of rated output. They therefore never go out completely.

A similar effect can be caused by long lines positioned in parallel.

Dimmer meets lamp: Not all of them are compatible

For infinitely variable control, not only does the LED lamp have to be dimmable, but the dimmer also has to be LED-compatible. Theben has developed several solutions for this purpose:

- Presets for different LED lamps
- Dimming curves that can be reloaded via ETS

Dimming LEDs!

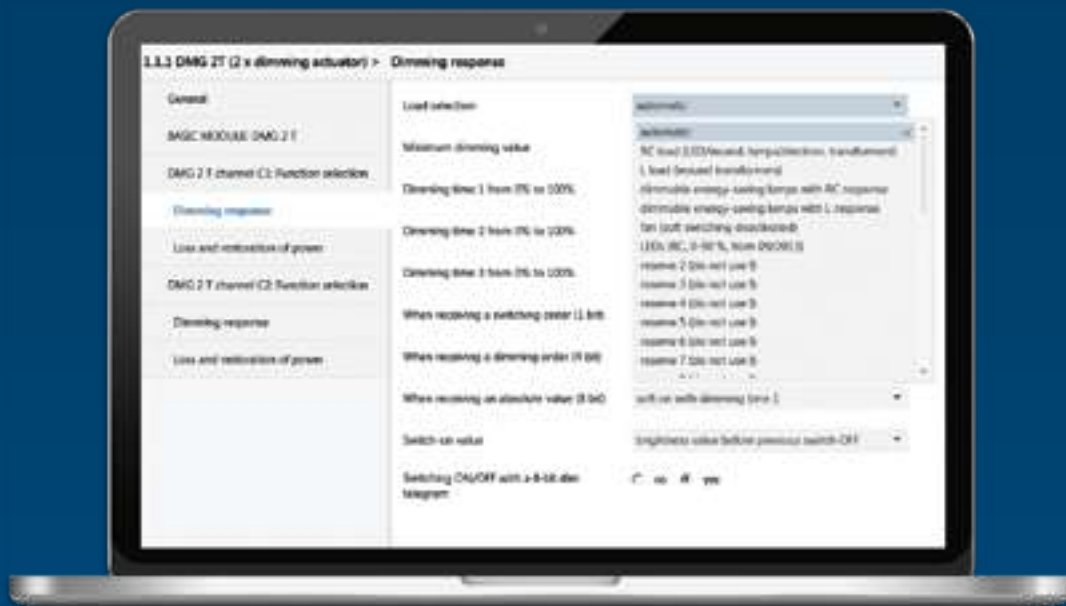

Theben is a master of that

A matter of settings Selecting presets

LED-compatible switching devices from Theben, such as the DIMAX 534 plus universal dimmer, offer additional setting options for perfect adaptation to this technology.

A minimum brightness for LED lamps with low wattages can be set using potentiometers and rotary switches. Even the type of control, leading or trailing edge control, can be preselected. This allows practically all dimmable LED lamps of renowned manufacturers to be controlled reliably.

Up to date with KNX Reloading dimming curves

The KNX universal dimmer actuator from Theben goes one step further: the ETS KNX programming software stores various dimming curves, which correct the dimming response appropriately depending on the lamp used, thus ensuring seamless, infinitely variable dimming.

Another advantage of the new dimming actuators is the ability to extend the dimming curves. New dimming curves – e.g. for future lamps – can be imported via ETS. With this update capability, KNX dimming actuators ensure your investments are well protected.

Successfully shaping the energy transition with CONEXA Solutions for municipal utilities & energy providers

The CONEXA 3.0 Performance Smart Meter Gateway from Theben is a secure interface connecting energy suppliers and consumers.

CONEXA ensures that you are able to determine and bill for energy consumption precisely. CONEXA and LUXORliving can be used to create KNX-based smart home solutions that allow for exact assignment and billing.

The plug-on CLS added-value module lets you benefit from innovative value-added services and put completely new business models into effect. And we don't mean at some vague point in the future, but right now..

→ Find out more at www.smart-metering-theben.de

6 good reasons to choose the CONEXA 3.0 Performance Smart Meter Gateway

#01
Certified by the German Federal Office for Information Security according to Common Criteria EAL 4+

#02
Expandable with the CLS added-value module

#03
Multi-client capability for up to 20 meters

#04
Interoperable with all relevant admin systems

#05
Compatible with measuring systems for electricity, gas, water & heat

#06
Can be updated for certified functions

Added value & applications: With CONEXA 3.0 Performance, you just get more!

Die Themenlandkarte des BMWi und BSI bildet die strategische Grundlage zur Digitalisierung der Energiewende. Das Messstellenbetriebs-Gesetz (MsbG) legt in diesem Rahmen die Einsatzbereiche eines Smart Meter Gateways fest.

Die Anwendungen reichen von **Smart Metering/Sub-Metering** und **Smart Grid** über **Smart Mobility** und **Smart Home/Smart Building** bis zu **Smart Services**. Eine enorme Spanne an Einsatzbereichen, die nicht jedes SMGW abdecken kann. CONEXA schon.

At the moment, Theben is the only provider to already have a solution in its portfolio for every category covered by the topic map from the BMWi (German Federal Ministry for Economic Affairs and Energy) and BSI (German Federal Office for Information Security).

Device & development platform: The smart ecosystem for the energy transition

From the very beginning, the CONEXA 3.0 Performance Smart Meter Gateway was developed with the aim of covering ALL the areas included in the BMWi and BSI topic map. At the same time, CONEXA and its added-value module are just one part of Theben's smart technology platform. When combined with the CSX 324 control box and the LUXORliving smart home system, they are able to realise smart mobility, smart grid and smart home/ smart building applications that are really helping to move on the process of digitalising the energy transition successfully.

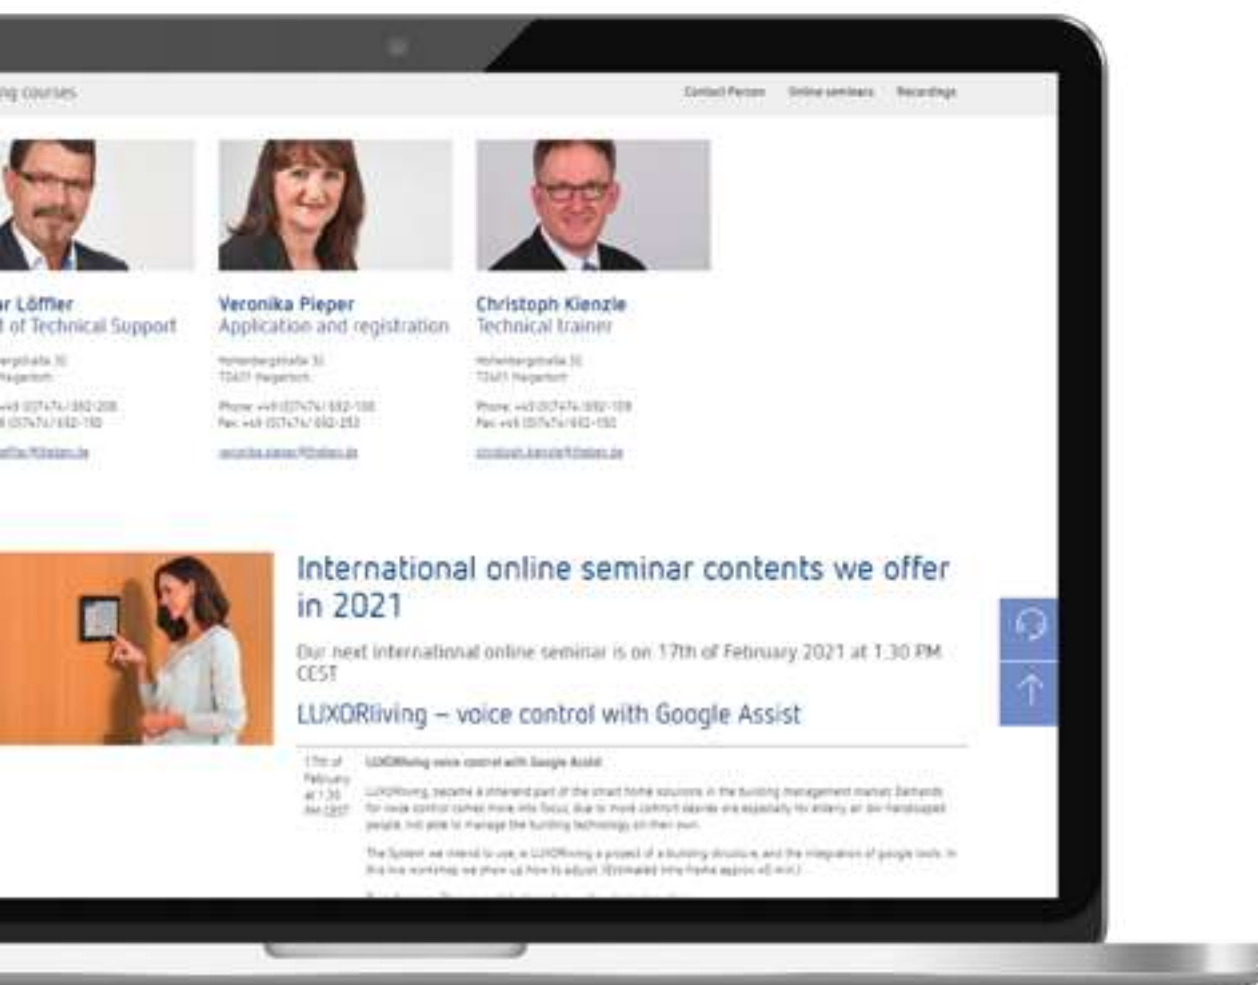

Equipping you for day-to-day tasks

Online and offline training

Our practical training sessions familiarise you with the latest developments, trends, standards and regulations to help you strengthen your competitive position. Basic theory is important – but our seminars focus primarily on putting knowledge into practice to equip you for your day-to-day tasks.

For details of all online and offline training events, visit
www.theben.de/training-courses

We're always there for you: 24 hours a day, 7 days a week!

[www.theben.de/

Amazingly convenient With simple start-up

Theben apps stand out from the crowd thanks to their security, convenience and incredibly easy operation. The best news of all is that they can be downloaded free of charge from the app stores.

For all the info on our apps, visit www.theben.de/app-en

iONplay

Program and control the iON 108 KNX Bluetooth room controller.

LUXORplay

Control and operate the LUXORliving smart home system with complete ease.

OBELISK top3

Easily program digital time switches.

theSenda Plug

Easily program LED spotlights, and presence and motion detectors.

MAXplus

Control and program the DIMAX 544 plus.

RAMSES BLE

Easily program and control the RAMSES room thermostat.

Our apps are ready and waiting in the stores!

Our apps are ready for you to download from the usual stores:

→ Anroid: Google Play Store

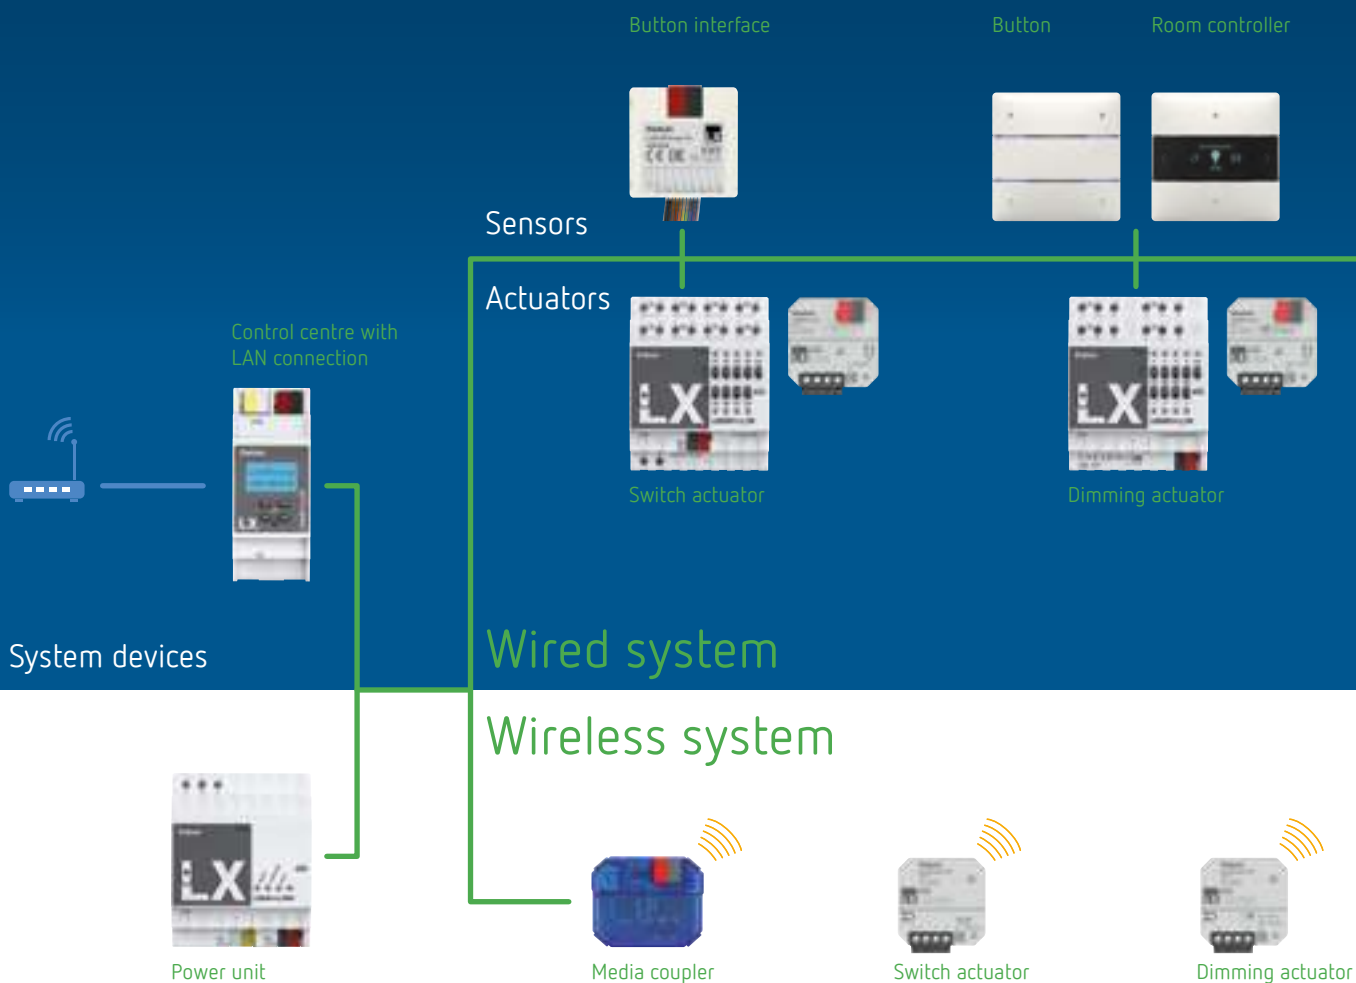

→ iOS: Apple Store

Simply flexible when it comes to set-up.

LUXORliving – intuitive operation

Simply wire, set up, program and you're done. Or retrofit with wireless actuators. The visualisation is generated automatically. With LUXORplug, you can create the project file in an instant. Whether you are carrying out the installation at your office or directly on site, you have everything at your fingertips. And online via the Theben cloud, you have everything to hand with the LUXORplay app – total convenience on a smartphone or tablet.

KNX Certified components

LUXORliving uses standard KNX communication, making it a secure investment that is better fit for the future compared to proprietary systems. Updates ensure it is always at the cutting edge and the system is easy to extend if necessary. The show-stopper: LUXORliving has as much KNX as is needed and as little complexity as possible. That's what makes LUXORliving so incredibly simple. For the installer as well as for the user.

Simple start-up

You thought LUXOR was easy to install. LUXORliving is even easier. Easy to assemble, to wire and to set. Job done. No ETS. No licence required. No prior knowledge either. Just go with your intuition – speedy, safe, successful.

BUS Flexible BUS wiring

In conventional set-ups, the functions are preset and fixed through the wiring. This is not the case with LUXORliving. Based on flexible BUS wiring, lights, roller blinds or other applications can be assigned to the buttons of your choice. This gives you leeway to change existing installations and reduces costs, as fewer switches are needed.

Super simple to install.

Old friends – installation with LUXORliving

LUXORliving makes a lot of things easier for everyone. But it keeps some things, such as the installation process, as simple as you've come to expect from Theben and LUXOR.

Free push
button selection

With many smart home systems, the buttons are preset. This is not the case with LUXORliving. With this system, homeowners can choose for themselves whether they use the LUXORliving iON button or any other conventional button in connection with our binary inputs and button interfaces.

Clever
presence simulation

When the occupants are at home, they use LUXORliving. When they're not at home, LUXORliving is of use to them. The clever smart home system makes sure that the lights come on and the blinds go down every evening, leaving the occupants free to enjoy their holiday without having to worry.

Custom
scenarios

Lighting moods and roller blind positions can of course be programmed freely and activated with a command as required. This means that each individual can create the scenes of their choice.

Home, smart home!

LUXORliving smart home system

LUXORliving is the intuitive smart home system from Theben, offering all-round home comfort, whilst avoiding unnecessary waste. LUXORliving controls everything that matters: Switching lights on and off. Dimming. Controlling the heating and the blinds.

And the best thing: LUXORliving is so easy to assemble, install and use that you don't need a system integrator – unless you really want one!

Plug & play:
LUXORplug start-up software and LUXORplay app for operation.

Safety first.

LUXORliving is VDE-certified.

Our home is more than just a roof over our heads. It is somewhere where we want to feel safe and secure. LUXORliving helps to give you this feeling right across the board.

This is also certified by the VDE Institute, which has awarded LUXORliving the seal for "verified information security" after thorough testing.

Safety first.

Description

LUXORliving iON2

- Push-button sensor with 2 buttons and 2 status LEDs with integrated temperature sensor
- For controlling of the functions switching, dimming, blinds, scene in the LUXORliving system
- Multi-colored status LEDs
- Automatic brightness control of the status LEDs depending on the ambient brightness
- Integrated temperature sensor for room temperature control with LUXORliving heating actuators
- Transparent cover for individual labeling in the scope of delivery
- Installation of two ION push-button sensors on standard double socket with accessory 9070822 possible (standard combination distance 71 mm)

LUXORliving iON4

As LUXORliving iON2, but:

- Push-button sensor with 4 buttons and 4 status LEDs with integrated temperature sensor

LUXORliving iON8

- Room controller with integrated room temperature controller
- LC display for displaying functions, icons and values
- 10 freely parameterizable functions
- Display of various icons for the respective functions
- For controlling of the functions switching, dimming, blinds, scene, temperature control in the LUXORliving system
- Automatic brightness control of the display depending on the ambient brightness

- Installation of two ION push-button sensors on standard double socket with accessory 9070822 possible (standard combination distance 71 mm)

LUXORliving S16

Smart Home system LUXORliving

- LUXORliving is the simple smart home system from Theben, offering all-round home comfort, whilst avoiding unnecessary waste. Switching lights on and off. Dimming. Regulating heating and controlling blinds.
- That's what it's all about. And the best thing: LUXORliving is so easy to assemble, install and use that you don't need to be a specialised fitter – unless you really want to!
- Anyone who is building or renovating should include LUXORliving in their plans. The smart home system makes houses and flats more comfortable and provides a pleasant working atmosphere in offices and doctor's surgeries too. What's more, it creates optimum conditions for you to use your energy-saving potential.

Home and building control

Smart Home system LUXORliving, Dimming actuators

LUXORliving D2

LUXORliving D4

Description

Common functions

- Universal dimmer actuator LUXORliving
- For dimming dimmable LED, incandescent lamps, LV, HV halogen lamps and energy saving lamps
- Also suitable for dimming of dimmable energy-saving lamps

- LED switching status display for each channel

- Manual operation on device

LUXORliving D2

- 2-way universal dimmer actuator LUXORliving

- Dimming output: 400 W per channel, dimming area 0-100%

LUXORliving D4

- 4-way universal dimmer actuator LUXORliving

- Dimming output: 200 W per channel, dimming area 0-100%

Product selection

Number of channels	Switching capacity per channel	Type	Article number
2	400 W	LUXORliving D2	4800470
4	200 W	LUXORliving D4	4800475

Technical data

	LUXORliving D2	LUXORliving D4
Operating voltage	230 V AC	
Stand-by consumption	0,9 W	< 1 W
Width	4 modules	
Lamp types	Incandescent, low-voltage and high-voltage halogen and dimmable energy saving lamps and LED	
Switching capacity dimmable energy saving lamps per channel	400 W	200 W
Switching capacity dimmable 230 V LED (typ.) per channel	Trailing edge (RC-mode): 400 W	
Incandescent/halogen lamp load	400 W	200 W
Type of protection	IP 20	
Protection class	II according to EN 60 669	

Connection diagrams

Home and building control

Smart Home system LUXORliving, Flush-mounted actuators

Description

Common functions

- 1-way flush-mounted actuator LUXORliving
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload

LUXORliving D1

- 1-way flush-mounted dimming actuator LUXORliving
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers
- Easy to adapt to different lamps thanks to automatic load detection

- Adjustable dimming curve for precise and flicker-free dimming
- The binary inputs are assigned to the dimming output as standard (function test before programming)

LUXORliving J1

- 1-way flush-mounted blind actuator LUXORliving
- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- The binary inputs are assigned to the output as standard (function test before programming)

LUXORliving S1

- 1-way flush-mounted switching actuator LUXORliving

- 1x NO contact & 1x NC contact with common control
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function
- The binary inputs are assigned to the switch output as standard (function test before programming)

LUXORliving H1

- 1-way flush-mounted heating actuator LUXORliving
- Noiseless control of thermal actuators 230 V AC
- Integrated temperature controller heating / cooling
- Valve protection function

Home and building control

Smart Home system LUXORliving, Binary input

Description

LUXORliving T4 RF

- 4-way flush-mounted wireless push-button interface
- Encrypted wireless communication
- 4 binary inputs for potential-free buttons and signaling contacts
- 1 additional input for temperature sensor
- Free assignment of the functions switching, dimming, blinds, temperature measurement and transmission
- Easy installation due to the compact housing
- Can be used with 4-way push-button module (9070806)

LUXORliving RF1

- Connects LUXORliving RF devices of a radio line with the twisted-pair bus
- Power supply via KNX bus voltage
- Supports long frames for „KNX Secure“ and enables faster download of large applications in parallel
- Ranges of max. 30 m within the building are possible
- Has a repeater function, i.e. received telegrams are sent again to increase the range

Product selection

Type	Article number

Smart Home system LUXORliving, Binary input

LUXORliving B6

Description

- 6-way binary input LUXORliving
- 6 floating universal and wide-range voltage inputs (10-240 V AC/DC or internally generated auxiliary voltage of approx. 12 V DC)
- Software functions: Switch/push-button, dimming, blinds
- LED switching status display for each channel
- Manual operation on device

Product selection

Number of channels	Type	Article number
6	LUXORliving B6	4800430

Technical data

LUXORliving B6			
Operating voltage	110–240 V AC	Type of protection	IP 20
Stand-by consumption	< 0,3 W	Protection class	II according to EN 60 730-1
Width	4 modules		

Description

Common functions

- Binary input sensor interface LUXORliving
- Can be installed in flush-mounted sockets with conventional sensors/switches
- Software functions: Switch/push-button, dimming, blinds
- Colour coding of wiring pairs

LUXORliving T2

- 2-way binary input sensor interface
- 4-pole cable connection

LUXORliving T4

- 4-way binary input sensor interface
- 6-pole cable connection

- 2 NTC inputs for detection of the actual temperature

LUXORliving T8

- 8-way binary input sensor interface
- 10-pole cable connection

Home and building control

Smart Home system LUXORliving, Heating actuator

Description

- LUXORliving heating actuator for controlling thermal actuators
- Option of channel-based actuator control: 24 V DC switching or 0–10 V DC continuous
- Integrated relay for demand-based control of heating circuit pump
- No room thermostat required: each channel has a temperature control
- Can be installed directly in the heating circuit distributor
- Screwless terminal technology
- Integrated power supply for max. 12 thermal actuators
- Continuous or switching actuating value can be selected
- Integrated valve protection - Manual operation on device

Product selection

Number of channels	Type	Article number
6	LUXORliving H6 24V	4800441

Technical data

Convenient. Stylish.

iON touch sensors and room controllers

Switch on and dim lights, raise and lower blinds, control the room temperature, or save and activate individual scenes. With Theben iON touch sensors and room controllers, a wide range of functions in any KNX-based smart building and in the Theben LUXORliving smart home system can be controlled simply by pressing a button. ID AID has come up with a frameless design that means iON cuts a stylish figure in any room.

- Simple integration thanks to a built-in bus coupling unit
- Integrated sensor for easy temperature measurement
- Reliable status indication via coloured LEDs or LC display
- Customisable button labels

iON 102 KNX
- 1-way touch sensor
(4969232)

iON 104 KNX
- 2-way touch sensor
(4969234)

iON 108 KNX
- 20-way room controller
(4969238)

For technical details, see page 52 onwards.

Did you know that our iON touch sensors and room controllers are also available in LUXORliving versions? For more information, see page 22.

A subtle presence – day and night

Multiple colours or one. Bright or dark. The status LEDs of iON 102 and 104 inform you about the current status of the touch sensor. You decide how: in vivid colours or in elegant monochrome. The brightness of the LEDs automatically adjusts to the surrounding brightness. They gleam a little less at night, so no one is disturbed, and a little brighter during the day, so they are clearly visible.

Clearly convenient

iON 102 and 104 can be labelled according to your needs and preferences. You can choose between clear function descriptions, such as “light on”, “TV scene” or “blinds up”. Or you can design the surface entirely to suit your taste. It’s even easier if you download our practical templates from www.theben.de/ion-en

More functions – more convenience

iON 108 room controllers feature a high-quality and extremely durable LC display. So you see clearly what's going on. Select an icon for each of the 10 or 20 functions and assign suitable function names to them. The current status is also displayed. Operating your smart home couldn't be easier.

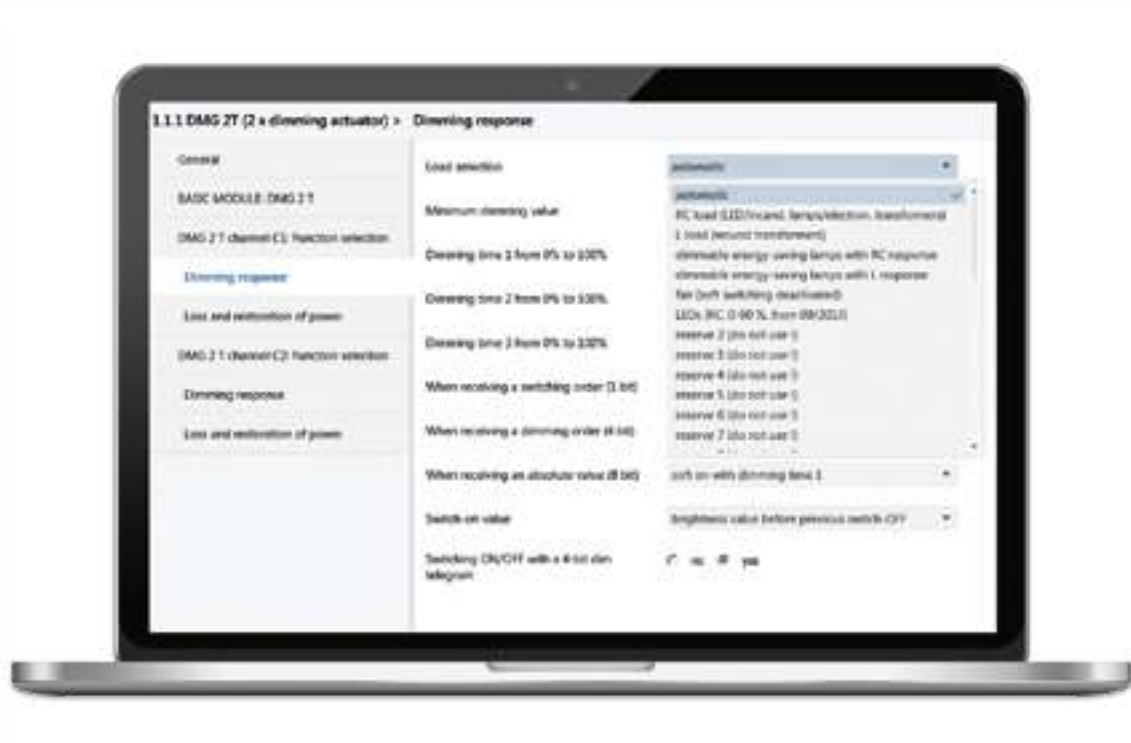

Speaking of operation: iON 108 KNX can also be easily controlled via Bluetooth using an app. App operation is perfect for meeting rooms or hotel rooms. Guests simply control the functions of the room themselves.

Dimming LEDs precisely Today and in the future

Whether you opt for the FIX series or the MIX series – with KNX universal dimmer actuators from Theben you can steplessly dim LED, halogen and energy-saving lamps without any flickering. The only prerequisite is that the selected lamp is dimmable. In view of the increasing number of connected LED lamps with small wattages, multiple channels provide greater freedom of design.

Up to date with KNX Reloading dimming curves

KNX universal dimmer actuators from Theben go one step further: the ETS KNX programming software stores various dimming curves, which correct the dimming response appropriately depending on the lamp used, thus ensuring seamless, infinitely variable dimming. Dimming curves can also be individually adapted to your lamps for a consistent dimming response. Another advantage is the high dimming output with up to 400 LED watts per channel. This output can even be increased to 800 watts by connecting 2 channels in parallel.

Continuous, flicker-free, consistent KNX dimming actuators for all LED wattages

MIX2 range (page 54 onwards)

Flush-mounted actuator range
(page 76 onwards)

FIX1 and FIX2 ranges (page 68 onwards)

Optimised for small wattages

The times of high wattages are over. Today, the art is in dimming LEDs with small wattages. Theben is on top of this trend, offering dimming actuators with a minimum load of just 2 watts.

Optimised dimming curves

Various dimming curves are stored in the ETS KNX programming software and these correct the dimming response appropriately depending on the lamp used, thus ensuring step-less dimming.

Fast start-up

Buttons (25%, 50%, 75%, and 100%) allow quick function tests to be performed for start-up, even without a bus connection. In the case of the MIX series, the bus module can even be plugged in afterwards.

Versatile scene function

Like the RMG 8 S KNX switching actuator, the DMG 2 T KNX allows you to save different scene functions.

Mix and match

Everything you need for KNX

Basic module (G)

+ maximum 2 extension modules (E)

MIX2 benefits at a glance

1. Removable bus coupling unit

The installer fits the basic module (G). Meanwhile, the bus coupling unit is configured by the system integrator – from the comfort and convenience of the office. Then, just before start-up, the module is simply plugged in – job done! This is a cost-effective approach because you do not necessarily need an installer with an expert knowledge of bus technology to be present on site for the installation and wiring.

2. Inexpensive extension devices

As only the basic module is fitted with a bus coupling unit, the costs of the extension devices (E) are up to a third lower because fewer system devices are required. This really pays off. Especially in property construction. Just do the maths and you'll see for yourself!

3. Flexible expandability

Controlling and dimming lighting, adjusting the heating and indoor climate and ensuring protection from the sun are not just tasks that the KNX MIX2 range can handle – they are what it was made for! With MIX2, you can create a solution that is individually tailored to each room and its specific needs. Only Theben offers this flexibility.

4. Clearly arranged application

The configuration menus in ETS are not only identically structured for all actuators, but also very clearly and intuitively arranged. You can select the actuators you want via drop-down menus according to your project and requirements. And if you need an extension module with a different range of functions, you can even select them later on. Only Theben offers this.

MIX2 actuators – the video
Intelligent, flexible, expandable

Our MIX2 video explains the many advantages of the MIX2 series in an easily understandable way.

www.youtube.com/TheThebenAG

Mixing it up – with 129 functions and up to 729 combinations

Switching

However you want it
Switch things on/off with or without a delay or receive a warning before the staircase light goes out, e.g. using the 4-way C load switch actuators, which offer you new levels of freedom on up to 12 channels. They feature current detection and are designed for higher lamp loads.

Switch actuators

MIX2 RMG 4 U KNX
MIX2 RME 4 U KNX
MIX2 RMG 4 I KNX
MIX2 RME 4 I KNX
MIX2 RMG 8 S KNX
MIX2 RME 8 S KNX

Dimming

But done right
Theben's universal dimming actuators have already proven themselves on the market. Compatible with all currently available LED lamps, they are flicker-free and ensure a beautifully even increase in brightness. And they have been enthusiastically received without exception. They are considered to be among the best dimming actuators of all.

Dimming actuators

MIX2 DMG 2 T KNX
MIX2 DME 2 T KNX

Blinds

Flexible control
The switch/blind actuators allow you complete flexibility when it comes to switching and control. Choose between 4 to 8 or 12 blinds and 24 switching channels. Or mix and match. You can do all this with just three modules. This approach gives you more freedom in how you use the channels – particularly, as you can assign the modules subsequently however you like.

Switch/blind actuators

Heating

The key to affordable heating
Theben's heating actuators allow you to detect the temperature in individual rooms using affordable temperature sensors. Temperature control takes place in the actuator itself and the target temperature can, for example, be set centrally using the theSer-va KNX visualisation solution.

Heating actuators

MIX2 HMG 6 T KNX
MIX2 HME 6 T KNX

Binary inputs

Universal application
Theben binary inputs cover the full range of contacts and voltages – whether floating contacts, or 24 V or 230 V. Each of the binary inputs offers six of them. That means more flexibility and greater security of investment. Not only that, but each channel can be tested manually during maintenance or service.

Binary inputs

MIX2 BMG 6 T KNX
MIX2 BME 6 T KNX

KNX – one technology offering unlimited options

KNX turns buildings into something more – whether used in universities, schools, other administrative and office buildings, nursing homes and hospitals, museums, hotels or private homes. The advantage of a KNX installation is its versatility. With KNX, all building functions can be linked, programmed, and controlled, from the HVAC systems, lighting and shading right through to the alarm, safety and information systems.

All these functions can be controlled automatically via intelligent sensors, manually at the control units inside the rooms or centrally via a visualisation system – either at home or while out and about using your smartphone or tablet.

Theben, KNX and the KNX Association The fieldbus and the history behind it

KNX stands for “Konnex” or “Connectivity” and is a fieldbus for building automation. KNX came about as the result of a merger between the European organisations EIBA, EHSA, and BCI, who were all seeking a common standard for the fieldbuses in existence at the time. Today, KNX is the global standard for house and building automation (ISO/IEC 14543). Worldwide, there are more than 90,000 trained KNX partners in 190 countries. The rules and specifications for the KNX technology are defined and regulated by the KNX Association, which now has a global membership of more than 495 companies. KNX thus stands for high security of investment and technology that is extremely future-proof.

Theben was one of the very first companies to join the association and, as a member of the Executive Committee, actively influences the further development of KNX technology. In addition, we have been a member of the KNX Technology Committee since 2015. In 2019, Theben was the first manufacturer to introduce KNX wireless actuators according to the Data Secure standard.

Theben – a competent partner for everything to do with KNX.

KNX, Push-button sensors

Description

iON 102 KNX

- Push-button sensor with 2 buttons and 2 status LEDs with integrated temperature sensor
- Secure communication via KNX-RF with support of „KNX Data Secure“
- For controlling of the functions switching, dimming, blinds, value transmitter, operating mode, scene, color control, sequence
- Up to 3 different telegrams per button
- Sending different telegrams with a short, long or double click
- Multi-colored status LEDs with adjustable colors for each LED separately
- Behavior of each status LED can be set: static, flashing or pulsing
- Brightness of each status LED can be individually adjusted via object or parameter
- Automatic brightness control of the status LEDs depending on the ambient brightness

- Integrated temperature sensor for visualization and temperature control via heating actuators
- Function monitoring via object (signaling dismantling)
- Installation of two iON push button sensors on standard double socket with accessories 9070822 possible
- Transparent cover for individual labeling in the scope of delivery

iON 104 KNX

As iON 102 KNX, but:

- Push-button sensor with 4 buttons and 4 status LEDs

iON 108 KNX

- Room controller with integrated bus unit
- Secure communication via KNX-RF with support of „KNX Data Secure“
- Access to the room controller via Bluetooth and operation with the iONplay app

- LC display for displaying functions, icons and values
- Integrated temperature controller for regulating and controlling the operating mode, temperature and fan level
- 20 freely parameterizable functions
- Free assignment of icons to the functions (40 icons to choose from)
- For controlling of the functions switching, dimming, blinds, value transmitter, operating mode, scene, color control, sequence
- Display brightness individually adjustable via object or parameter
- Automatic brightness control of the display depending on the ambient brightness
- Function monitoring via object (signaling dismantling)
- Installation of two iON push button sensors on standard double socket with accessories 9070822 possible

Easy operation via app possible (iON 108 KNX)

Home and building control

KNX, Switching actuators

Description

Common functions

- Switching actuator
- LED switching status display for each channel
- Manual operation on device (even without bus connection)
- Switching functions: On/Off, pulse, On/Off delay, staircase light with warning
- Logical links: e.g. lock, AND, release, OR
- Adjustable characteristics: e.g. switching, delayed switching, pulse function
- Links, type of contact (NC contact/NO contact) and participation in central commands such as continuous On, continuous Off, central switching and save/call up scene

RMG 4 U KNX

- 4-way switching actuator MIX2
- Base module MIX2
- Can be upgraded to maximum of 12 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of switching actuators is possible without KNX bus module

RME 4 U KNX

- 4-way switching actuator MIX2
- Extension module MIX2
- For upgrading to maximum of 12 channels

RM 4 U KNX

- 4-way switching actuator

KNX, Blinds actuators

Description

Common functions

- Universal dimmer actuator
- For dimming dimmable LED, incandescent lamps, LV, HV halogen lamps and energy saving lamps
- Also suitable for dimming of dimmable energy-saving lamps
- Also suitable for controlling fans
- LED switching status display for each channel
- Manual operation on device (even without bus connection)
- The dimming output can be upgraded by using additional dimmboosters „DMB 1 T KNX“ - dimming output 300 W/VA (incandescent lamp) for each dimmbooster. Output to a maximum of 2000 W/VA (incandescent lamp) by using max. 4 boosters possible
- Automatic load detection (can be deactivated)
- For R, L and C loads

DMG 2 T KNX

- 2-way universal dimmer actuator MIX2
- Base module MIX2
- Can be upgraded to maximum of 6 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of switching actuators is possible without KNX bus module
- Dimming output: 400 W per channel or 800 W in parallel operation

DME 2 T KNX

- 2-way universal dimmer actuator MIX2
- Extension module MIX2
- For upgrading to maximum of 6 channels

DM 2 T KNX

- 2-way universal dimmer actuator FIX1

DM 4 T KNX

- 4-way universal dimmer actuator FIX2

DMB 1 T KNX

- 1 channel dimming output extension module ‚Dimmbooster‘

- Also suitable for dimming of dimmable energy-saving lamps
- Also suitable for controlling fans

- LED switching status display for each channel
- Manual operation on device
- Dimming output: 200 W per channel or 400 W in parallel operation
- Automatic load detection (can be deactivated)
- For R, L and C loads

DM 4-2 T KNX

- 4-way universal dimmer actuator FIX1

DM 8-2 T KNX

- 8-way universal dimmer actuator FIX2

Description

Function	Number of channels	Type	Article number
FIX1 module	4	DM 4-2 T KNX	4940280
FIX2 module	8	DM 8-2 T KNX	4940285

Technical data

	DM 4-2 T KNX	DM 8-2 T KNX
Operating voltage KNX	Bus voltage, ≤ 10 mA	Bus voltage, $\leq 17,5$ mA
Operating voltage	230–240 V AC	
Frequency	50–60 Hz	
Stand-by consumption	< 1 W	
Width	4 modules	8 modules
Max. cable cross section	Solid wire: 0.5 mm ² to 6 mm ² Stranded wire with end sleeve: 0.5 mm ² to 4 mm ²	
Lamp types	Incandescent, low-voltage and high-voltage halogen and dimmable energy saving lamps and LED	
Switching capacity per channel	200 W	
Switching capacity in parallel operation	400 W	
Dimming capacity LED lamp (typ.) per channel	Trailing edge (RC-mode): 200 W	
Dimming capacity LED lamp (typ.) in parallel operation	Trailing edge (RC-mode): 400 W	
Dimming capacity energy saving lamps per channel	Trailing edge (RC-mode): typ. 200 W	
Dimming capacity energy saving lamps in parallel operation	Trailing edge (RC-mode): typ. 400 W	
Switching capacity min.	2 W	
Ambient temperature	-5 °C ... $+45$ °C	
Type of protection	IP 20	
Protection class	II according to EN 60 669

SMG 2 S KNX

SME 2 S KNX

Description

Common functions

- 2-way 1–10 V control unit MIX
- Free combination of switching, dimming, blinds and heating control as well as binary inputs
- Switching and dimming of lighting circuits in combination with electronic ballasts (EBs and ballasts LED)

- 1–10 V inputs and one switch output (relay contact) per channel
- LED switching status display for each channel
- Manual switch with On/Off/Bus settings (also without bus voltage)
- Zero-cross switching for relay-saving switching and high lamp loads

SMG 2 S KNX

- Base module MIX
- Can be upgraded to maximum of 6 channels

SME 2 S KNX

- Extension module MIX
- For upgrading to maximum of 6 channels

KNX, Gateways

DALI-Gateway KNX plus

Description

- The DALI Gateway KNX serves as an interface between the the DALI and the KNX system
- A maximum of 64 DALI members can be connected to a DALI output
- Control in 16 groups or in individual control
- Color light control with Device Type 8 (DT8) for 16 groups: Color temperature, XY, RGB, HSV, RGBW
- Time-dependent color control (also for human centric lighting applications)
- Scene module for 16 scenes (including color setting DT8)
- Effects module for sequential controls (including color setting DT8): Color temperature, XY, RGB, HSV, RGBW
- Energy saving by switching off the electronic ballast power supply in the groups (communication object)
- Easy replacement of ECGs in the event of an error
- Support of single-battery emergency lights (DT1) and emergency light systems with central battery
- LC display (2x 12 characters) for menu guidance during start-up and parameter settings
- Commissioning using the controls on the device, the integrated web server or the free ETS app (DCA)

Home and building control

KNX, Flush-mounted actuators

Description

Common functions

- 1-way flush-mounted actuator
- Secure communication via with support of „KNX Data Secure“
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, window contacts, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload

SU 1 KNX

- 1-way flush-mounted switching actuator
- 1x NO contact & 1x NC contact with common control
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function
- The binary inputs are assigned to the switch output as standard (function test before programming)

JU 1 KNX

- 1-way flush-mounted blind / switching actuator
- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- Integrated automatic ventilation function
- Flexible configuration options: blind actuator or 2-channel switch actuator
- The binary inputs are assigned to the output as standard (function test before programming)

DU 1 KNX

- 1-way flush-mounted dimming actuator
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers
- Easy to adapt to different lamps thanks to automatic load detection

- Adjustable dimming curve for precise and flicker-free dimming
- The binary inputs are assigned to the dimming output as standard (function test before programming)

HU 1 KNX

- 1-way flush-mounted heating actuator
- Noiseless control of thermal actuators 230 V AC
- Function selection as a heating actuator (continuous or switching) or as a heating controller (integrated temperature controller heating / cooling)
- Valve protection function and summer function

KNX, Flush-mounted actuators

Description

Common functions

- 1-way wireless flush-mounted actuator
- Secure communication via KNX-RF with support from KNX Data Secure
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload

SU 1 RF KNX

- 1-way wireless flush-mounted switch actuator
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function
- The binary inputs are assigned to the switch output as standard (function test before programming)

DU 1 RF KNX

- 1-way wireless flush-mounted dimming actuator
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers.
- Easy to adapt to different lamps thanks to automatic load detection
- Adjustable dimming curve for precise and flicker-free dimming
- The binary inputs are assigned to the dimming output as standard (function test before programming)

JU 1 RF KNX

- 1-way wireless flush-mounted blind actuator

- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- Integrated automatic ventilation function
- The binary inputs are assigned to the output as standard (function test before programming)

HU 1 RF KNX

- 1-way wireless flush-mounted heating actuator
- Silent control of 230 V AC thermal actuators
- Integrated heating/cooling temperature controller
- Valve protection function

KNX, Binary inputs / Media coupler

Description

TU 4 RF KNX

- 4-way flush-mounted wireless push-button interface
- Secure communication via with support of „KNX Data Secure“
- 4 binary inputs for potential-free buttons and signaling contacts
- 1 additional input for temperature sensor
- Free assignment of the functions switching, dimming, blinds, temperature measurement and transmission
- Easy installation due to the compact housing
- Can be used with 4-way push-button module (9070806)

Media coupler TP-RF KNX

- Connects KNX RF devices of a radio line with the twisted-pair bus
- Power supply via KNX bus voltage
- Supports long frames for „KNX Secure“ and enables faster download of large applications in parallel
- Ranges of max. 30 m within the building are possible
- Has a repeater function, i.e. received telegrams are sent again to increase the range

KNX, Binary inputs / Media coupler

Description

Common functions

- Binary input
- LED switching status display for each channel
- Manual operation on device (even without bus connection)
- Manual operation per channel for simulating the input states
- All inputs can be operated with different voltages and at different potentials
- Connectable cable length up to 100 m
- Free allocation of functions: switch / push button, dimming, blinds / roller blinds, counter, repeat telegram, sequences

BMG 6 T KNX

- 6-way binary input MIX2
- Base module MIX2
- Can be upgraded to maximum of 18 channels
- 6 floating universal and wide-range voltage inputs (10–240 V AC/DC or internally generated auxiliary voltage of approx. 12 V DC)
- 2 additional channels operable by buttons on the device, but without input
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of actuator is possible without KNX bus module

BME 6 T KNX

- 6-way binary input MIX2
- Extension module MIX2
- For upgrading to maximum of 18 channels

BM 6 T KNX

- 6-way binary input FIX1
- 6 floating universal and wide-range voltage inputs (10–240 V AC/DC or internally generated auxiliary voltage of approx. 12 V DC)
- 2 additional channels operable by buttons on the device, but without input

BM 12 T KNX

- 12-way binary input FIX2
- 12 floating universal and wide-range voltage inputs (10–240 V AC/DC or internally generated auxiliary voltage of approx. 12 V DC)
- 4 additional channels operable by buttons on the device, but without input

KNX, Binary inputs

Description

Common functions

- Binary input/binary output sensor interfaces
- Can be installed in flush-mounted sockets with conventional sensors/switches
- Flexible LED controlling, thanks to increased output current of 3 mA commercially available LEDs and low current LEDs can be controlled
- Inputs can be reconfigured to outputs with parameterizable flashing and pulsing function
- Colour coding of wiring pairs

TA 2 S KNX

- 2-way key interface
- 4-pole cable connection
- Free allocation of functions: Switch/key, dimming, blinds, valuator, sequences, controlling LED

TA 4 S KNX

- 4-way key interface
- 6-pole cable connection
- Free allocation of functions: Switch/key, dimming, blinds, valuator, sequences, measuring temperature, controlling LED

- 2 NTC inputs for detection of the actual temperature

TA 6 S KNX

- As TA 4 S KNX, but:
- 6-way key interface
 - 8-pole cable connection
 - Can be used with 4-way push-button module (9070806)

TA 8 S KNX

- As TA 4 S KNX, but:
- 8-way key interface
 - 10-pole cable connection

KNX, Presence detectors

Description

Common functions

- KNX Passive infrared presence detector for ceiling mounting
- Square detection range of 360° for safe and easy planning
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value

- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Self-learning time delay
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Extremely easy setting of energy saving characteristics with the new „eco plus“ function
- Test mode for checking function and detection range
- Parallel switching of several detectors in Master/Slave or Master/Master possible

- User remote control and management-remote control (optional)
 - Room monitoring
- thePrema P360 KNX UP**
- 3 channels light and 2 channels presence
 - 2 channels light C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
 - 2 presence channels can be set individually
 - Adaptable 3 channels light measurement
- thePrema S360 KNX UP**
- 2 channels light and 2 channels presence
 - 2 channels light C1, C2 with 1 light measurement
 - 2 presence channels can be set individually with parallel offset
 - Adaptable 1 channel light measurement

thePrema P360 KNX

thePrema S360 KNX

Description

- KNX multisensor
 - Consisting of KNX passive infrared presence detector and room air sensor (= 2 bus sharing units)
- Room air sensor functions**
- Measures CO₂ concentration, relative humidity, temperature and air pressure
 - Three independent, configurable thresholds for CO₂ concentration and relative humidity
 - Integrated room thermostat
 - 4 binary inputs
- Presence detector functions**
- Automatic presence and brightness-dependent control for lighting and HVAC
 - Square detection area 360°, up to 10 x 10 m (100 m²), for reliable and easy planning
 - 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without influence of brightness
 - 2 presence channels C4, C5 can be programmed individually
 - Adaptable 3-channel light measurement
 - Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL), halogen and incandescent lamps
 - Operation as fully or semi-automatic device, switchable
 - Switching operation or constant light control with standby function (orientation light)
 - Lighting dimmable in switching mode with standby function
- Brightness switching value or set point value configurable in lux using parameters, object or remote control
 - Teach-in of the brightness switching value or set point value
 - Setting of the room correction factor for brightness measurement calibration
 - Light time delay configurable using parameters, object or remote control
 - Configurable switch-on delay and presence time delay
 - Configurable detection sensitivity
 - Self-learning time delay
 - Reduced time delay in the event of short presence
 - Room monitoring function with reduced sensitivity only for detection of walking persons
 - Scene functionality
 - Extremely simple adjustment of energy saving behaviour with "eco plus" function
 - Test mode for checking function and detection area
 - Parallel switching of multiple presence detectors (master/slave or master/master)
 - Room monitoring
 - Remote operation with the following remote controls:
 - theSenda B app remote control
 - theSenda P service remote control
 - theSenda S user remote control

Set basic KNX AP Multi WH

Home and building control

KNX, Presence detectors

PlanoSpot 360 KNX DE WH

Description

PlanoSpot 360 KNX DE WH

- Passive infrared presence detector for ceiling installation
- Flat design, cover frame in white included in delivery
- Square detection area 360° (up to 64 m²) for reliable and easy planning
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Two differently sized detection zones for greater flexibility. Adjustable via parameters or remote control.
- Manual alignment of the detection area (swivel mechanism)
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- 3 directed light measurements
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- Switched or constant light control with 2 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Fully or semi-automatic
- Brightness switching value or set point value can be set in lux by using parameters, the object or via remote control
- Teach-in of the brightness switching value or the set point value
- Light time delay configurable
- Self-learning time delay can be set using parameters, object or via remote control
- Reduction of time delay when present briefly (short-term presence)
- Manual override by telegram or remote control
- 2 presence channels C4, C5, individually configurable
- Switch-on delay and time delay configurable
- Room monitoring with selective movement detection
- Setting the room correction factor for brightness measurement comparison
- Configurable sensitivity
- Extremely simple setting of the energy-saving ratio with the new «eco plus» function
- Test mode for checking function and detection area
- Scenarios
- Parallel switching of multiple presence detectors (Master/Slave or Master/Master)
- Installation in false ceilings with springs
- Surface mounting on ceilings possible with surface frame (optional)
- User remote control «theSenda S» (optional)
- Management remote control «theSenda B» (optional)
- Installation remote control «theSenda P» (optional)

Product selection

Swivel mechanism	Colour	Type	Article number
√	Pure white (similar to RAL 9010)	PlanoSpot 360 KNX DE WH	2039100

Technical data

	PlanoSpot 360 KNX DE
Operating voltage KNX	Bus voltage, approx. 8 mA (9 mA LED on)
Installation height	2–3,5 m
Setting range brightness	approx. 10–3000 lx/measuring off
Light switch-off delay	30 s–60 min
Stand-by dimming value	1–25 % of the lamp output
Stand-by time	30 s–60 min/on/inactive
Presence switch-off delay	10 s–120 min
Presence switch-on delay	10 s–30 min/inactive
Ambient temperature	0 °C ... +50 °C
Type of protection	IP 40 (when fitted)

Detection range (Square)

KNX, Presence detectors

Description

- KNX Passive infrared presence detector for ceiling mounting
- Round detection area 360°, up to Ø 24 m (452 m²)
- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measurement
- 2 presence channels can be parametrized individually
- Adaptable 1 channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

theRonda S360 KNX AP

theRonda S360 KNX FLAT DE

Description

- KNX Passive infrared presence detector for ceiling mounting
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- 2 channel light and 2 channel presence
- 2 channel light C1, C2 with 2 light measurements
- 2 presence channels can be parametrized individually
- Adaptable 2 channel light measurement
- Function aura effect, switches on the lighting group when there is a person in its detection area and dims the adjacent lighting groups
- Function chaser light, recognises the direction of movement of the people in the room and „predictively“ switches on the adjacent lighting group
- Function walking direction recognition
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

Home and building control

KNX, Presence detectors

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Square detection area allows accurate and simple planning
- IP 54 for versatile use
- 2 channels light for controlling one or two lighting groups
- Mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Switching or constant light control with stand-by function
- Adjustable sensitivity
- Choice of fully or semi automatic operation: In „Semi-automatic“ mode the light must be switched on manually and switches off automatically
- Short presence; Reduced switch-off delay time in case of a short presence
- Self-learning time delay
- Channel presence with switch-off delay and switch-on delay time and send values
- Function „monitoring“ with reduced sensitivity only to detect walking persons
- Channel brightness (Lux)
- Set brightness level via bus object
- Scene functionality (8-bit scenes)
- Selected parameters can be configured remotely using the theSendä B remote control. Parameter settings are made via ETS
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Parallel switching of several presence detectors (master-slave or master-master) possible
- Ceiling mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

Home and building control

KNX, Motion detectors

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- For integration into KNX building systems
- For outdoor use
- For installation on walls and ceilings
- Integrated temperature sensor
- For larger, commercial outdoor applications such as offices, public buildings, hotels, schools, car parks and warehouses
- Easy to program with KNX ETS software
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced
- Area limit via lens attachment
- Mixed light measurement
- Teach-in of current brightness value possible
- Pulse function
- Test function for checking detection area
- Installation on flush-mounted socket possible (60 mm)
- Single-handed plug-in installation
- Instant start-up possible via factory preset
- Controls are place protected
- Spacer and corner angle included

Description

IPsecure Interface KNX

- Interface IP and KNX
- For data exchange between KNX and IP networks
- Support of KNX IP Secure
- Meets the requirements of the KNXnet / IP standard
- Tunneling: Up to 5 Tunneling Server
- Firmware update possible (Theben IP Tool Software)
- Power supply: 12–30 V DC / PoE - IEEE 802.3af class 1

IPsecure Router KNX

- Router / interface / line coupler IP and KNX
- For data exchange between KNX and IP networks
- Support of KNX IP Secure
- Meets the requirements of the KNXnet / IP standard
- Complete filter table for all main groups (0... 31)
- Display of power failures on the bus (KNX IP Service)

- Unicast: Up to 10 devices can communicate via unicast
- Tunneling: 5 tunneling servers available (visualization, app ...)
- Firmware update possible (Theben IP Tool Software)
- Power supply: 12–30 V DC / PoE - IEEE 802.3af class 1

Product selection

Type	Article number
IPsecure Interface KNX	9070771
IPsecure Router KNX	9070770

Technical data

	IPsecure Interface KNX	IPsecure Router KNX
Operating voltage KNX	Bus voltage, ≤10 mA	
Operating voltage	12–30 V DC	
Width	2 modules	
Ambient temperature	-5 °C ... +45 °C	
Protection class	II according to EN 60 730-1	
Type of protection	IP 20	

Description

Interface USB KNX

- For communication between the PC and the KNX system to be programmed
- Fast download of applications by supporting long frames (from ETS 5)
- Support of KNX Data Secure communication

Line coupler S KNX

- For the connection of KNX lines or areas
- Galvanic separation of the lines / areas
- Long frame support (from ETS 5)
- Support of KNX Data Secure communication
- Telegrams can be forwarded, filtered or blocked
- Can also be used as a line amplifier (repeater)

Product selection

Home and building control

KNX, HVAC controller

Description

- Multi-functional display with room thermostat
- Glass front in white
- Freely configurable for displaying and controlling functions e.g. light settings, sun protection systems
- Backlit display and integrated time switch
- For control and regulation of heating, fan coils, air conditioning systems
- Up to 7 different display pages
- Automatic summer/winter time adjustment with power reserve
- Controls up to 8 rooms via own temperature profiles
- Weekly time switch with 8 channels with up to 3 different statuses, e.g. for light, shutters, fans etc.
- 3 heating programs
- Alternative continuous or on/off control
- Operation modes: comfort, stand-by, temperature reduction at night, frost protection
- Weather data from Theben weather stations can be displayed
- Free choice of programming via the ETS without plug-in
- Installation in flush-mounted socket

Colour	Type	Article number
Glass front in white	VARIA 826 S WH KNX	8269210

Technical data

	VARIA 826 S WH KNX
Operating voltage KNX	Bus voltage, ≤ 15 mA, (< 25 mA without power supply)
Operating voltage	230 V AC
Frequency	50 Hz
Stand-by consumption	0,4 W
Power reserve	1,5 years
Display	Display with 132 x 72 points (8 lines with various functions) e.g. title, switching, dimming, blinds/shutters, % value, HVAC, counter value, temperature, 2-byte value, 8/16 bit counter value etc.
Ambient temperature	0 °C ... +45 °C
Type of protection	IP 20
Protection class	II according to EN 60 730-1

Scale drawings

KNX-OT-Box S

Description

- The KNT-OT-Box S serves as an interface between the boilers with OpenTherm (bus system in heating and ventilation technology) and the KNX system (building system technology)
- This enables the bidirectional exchange of data between the OpenTherm boiler and the heat distribution via the KNX system (individual room control)
- In combination with the OT-Box (9070712) from the RAMSES 856 top2 OT (8569132) also heating systems without OpenTherm interface can be controlled
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module
- Button for OT-test-program
- The following functions are available with the KNT- OT-box:
 - Customised flow control
 - Weather-compensation flow control
 - Control of domestic hot water
 - Energy optimization of domestic hot water with solar support
 - Legionella protection program
 - Screed drying program

Home and building control

KNX, HVAC controller

RAMSES 718 P KNX

Description

- Individual room thermostat
- For controlling heating actuators or motorised actuators
- Can be used as a continuous or two point control (can also be combined).
- Continuous PI control can be configured for 2 stage heating (basic and additional stage, e. g. underfloor heating and radiators) or for heating and cooling (radiators and cooling surfaces)
- Two front panels are included in delivery: a numerical scale and a relative scale
- Rotary control can be limited via parameters
- Manual override button for presence or operation modes: comfort, stand-by, temperature reduction at night, frost protection
- 4 binary inputs for conventional switches/sensors (switching, dimming, blinds), also for external temperature sensor, window contact or presence signal
- Temperature sensor can be connected to give remote temperature reading
- LED (red) for heating mode, (blue) for cooling mode, LEDs for operation mode

KNX, HVAC controller

HMG 6 T KNX

HME 6 T KNX

HM 12 T KNX

Description

Common functions

- Heating actuator
- Short-circuit-proof and overcharge protected
- Continuous or switching actuating value selectable
- Valve protection function can be deactivated
- With the modes: comfort, standby, night as well as frost/heating protection
- Changeover to summer mode possible
- LED switching status display for each channel
- Manual operation on device (even without bus connection)

HMG 6 T KNX

- 6-way heating actuator MIX2
- With 6 temperature controllers (P/PI) for heating and cooling
- Base module MIX2
- Can be upgraded to maximum of 18 channels
- For controlling 6 thermal actuators 24 V–240 V AC in 2 groups with 3 outputs and 450 mA each
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of actuator is possible without KNX bus module

HME 6 T KNX

- 6-way heating actuator MIX2
- With 6 temperature controllers (P/PI) for heating and cooling
- Extension module MIX2
- For upgrading to maximum of 18 channels

HM 6 T KNX

- 6-way heating actuator FIX1
- With 6 temperature controllers (P/PI) for heating and cooling
- For controlling 6 thermal actuators 24 V–240 V AC in 2 groups with 3 outputs and 450 mA each

HM 12 T KNX

- 12-way heating actuator FIX2
- With 12 temperature controllers (P/PI) for heating and cooling
- For controlling 12 thermal actuators 24 V–240 V AC in 4 groups with 3 outputs and 450 mA each

HMT 6 S KNX

Description

- Heating actuator for controlling thermal actuators, switching 24 V DC or permanently 0–10 V DC
- Integration of up to 2 heating circuit pumps
- Flow temperature adjustment to meet requirements: Automatic calculation of the maximum actuating value for energy-efficient adjustment of the actuating value to actual requirements
- No KNX room thermostat needed: Flexible use of each channel as a heating actuator or heating controller
- Can be installed directly on a rail in the heating circuit distributor
- Screwless terminal technology
- Integrated power supply for a maximum of 12 thermal actuators
- Silent semiconductor switch (triac)
- For integrating boiler control
- Continuous or switching actuating value selectable

CHEOPS control KNX

CHEOPS drive KNX

Description

Common functions

- Motorised actuator for heater valve or for controlling the heating valves
- Display of valve stroke
- Automatic valve stroke recognition
- 2 inputs for window contact, presence detector, remote sensor (remote sensor only for CHEOPS control and only 9070191)
- Simple installation by clicking onto valve adapter
- Can be used in heating circuit distributor

- Integrated bus coupling unit
- With summer mode and valve protection
- 2 different valve adapters included (VA 10, VA 78)

CHEOPS control KNX

- Independent room thermostat and integrated temperature sensor
- Manual operation possible via 2 keys on the device
- Display via LEDs (red/blue for hotter/colder)
- Configurable as: Heating control (continuous control), two stage heating, heating and cooling

CHEOPS drive KNX

- Without integrated control
- Display via LEDs (red)

Home and building control

KNX, HVAC controller

Description

- CO₂ airquality sensor with integrated individual room thermostat
- Measures CO₂ level, relative humidity, temperature and barometric air pressure
- Three independent, configurable thresholds for the CO₂ level and relative humidity
- CO₂ setting range of 300-5000 ppm
- Actions can be carried out if thresholds are exceeded or not reached (send, priority, switching, value)
- For controlling heating actuators or motorised actuators
- Two front panels are included in delivery: a numerical and a relative scale
- Manual override button for presence or operation modes: comfort, stand-by, temperature reduction at night, frost protection
- 4 binary inputs for conventional switches/sensors (switching, dimming, blinds), also for external temperature sensor, window contact or presence signal
- Display of the current operating mode and heating/cooling mode through multi-colored LED

KNX, HVAC controller

Description

Common functions

- Fan coil actuator
- For controlling fan coils
- For 2 and 4 pipe systems
- For up to three fan stages
- Additional relay for electrical heater or cooler bank
- Potential-free input for window contacts or temperature sensor
- Potential-free, condensation monitoring
- Display of operation status via 9 LEDs
- Manual operation on device (fan stages, switching between heating and cooling)
- Adjustment of setpoint value for cooling in relation to external temperature
- Potential-free switching contact for either cooler or heater bank
- With emergency program

FCA 1 KNX

- For 2-way and 3-way valves

KNX, Digital time switches

TR 648 top2 RC KNX

TR 648 top2 RC-DCF KNX

Description

Common functions

- Digital time switch with yearly and astronomical time program
- 8 channels
- DuoFix spring terminals for 2 conductors each
- Text-oriented user guidance in display
- 800 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 8 year power reserve (lithium battery)
- ON-OFF switching times
- Pulse program
- Cycle program
- Extensive yearly clock functions

- Astronomical switching function (automatic calculation of sunrise and sunset times for the whole year)
- Switching preselection
- Permanent switching ON/OFF
- Count-down timer
- Integrated hour counter
- Holiday program
- 2 random programs
- Display backlight (can be turned off)
- PIN coding
- Automatic summer / winter time changeover
- Time and date synchronisation of other bus participants

TR 648 top2 RC KNX

- Time synchronisation via connection of external DCF or GPS antennas, additional positioning for astronomical program with GPS

TR 648 top2 RC-DCF KNX

- Time synchronisation via connection of external DCF antenna
- Can be operated without mains supply

Home and building control

KNX, Weather station, brightness sensor

Description

Meteodata 140 S KNX

- Self-contained outdoor weather station
- For measuring wind, rain, brightness and temperature
- For fully automatic blinds and sun protection control with automatic adjustment of blinds according to position of the sun
- Rain sensor with integrated heating
- The weather station can also be operated without mains supply. The heating of the rain sensor will not function then
- Measurement and evaluation directly on device
- Sun protection for up to eight facades via 3 integrated brightness sensors
- 8 sun protection channels
- 4 additional threshold channels for connection of external KNX sensors
- 6 logic channels
- Display of weather data e.g. with VARIA 826 KNX multi-function display

Meteodata 140 S GPS KNX

As Meteodata 140 S KNX, but

- Integrated GPS receiver (provides additionally time information)
- Automatic calculation of elevation and azimuth
- The weather station can also be operated without mains supply. The GPS module will not function then

Meteodata 140 basic KNX

As Meteodata 140 S KNX, but:

- Without rain sensor
- No automatic adjustment of blinds according to position of the sun
- 3 sun protection channels

KNX, Weather station, brightness sensor

LUNA 131 S KNX

Description

- Brightness and temperature sensor
- For brightness and temperature dependent controlling in outdoor areas
- 5 freely configurable channels: 1 sun protection channel and 4 universal channels
- Sun protection channel with automated sun protection especially for blind, awning and shutter applications
- Universal channels allow linking of brightness and temperature
- Brightness range from 1 - 100,000 lux
- Temperature range -20 °C to + 55 °C
- Learning object for brightness threshold

Description

OSIRIA 242 AR KNX, OSIRIA 242 SR KNX

- KNX indoor clock, round, double-sided
- With wall or ceiling holder (150 mm)
- White dials
- Black Arabic numerals
- Black bar hour and minute hands, red second hand
- White painted metallic housing
- Shock-resistant plexiglass
- Diameter dial: 400 mm

OSIRIA 251 BQ KNX

- KNX indoor clock, square, single-sided
- Wall clock limited protected against thrown balls e.g. for sports halls, schools, etc.
- White metallic dial with black DIN bar numerals
- Black bar hour and minute hands, red second hand
- Single-faced, robust, white painted metallic housing (RAL 9016) for heavy-duty applications
- Laminated safety glass
- 3-point fastening resistant to being pried out
- Dial: 400 mm x 400 mm

OSIRIA 232 BQ KNX

- KNX indoor clock, square, single-sided, for flush-mounted installation (for OP rooms)
- White metallic dial with black DIN bar numerals
- Black bar hour and minute hands, red second hand
- Stainless steel housing frame flush with tiles or wall V4A for wall installation (flush-mounted)
- Resistant to acids, cleaning agents and disinfectants; in the installed state protected against dust and water in acc. with protection rating IP 54 (DIN 40050)
- 3 mm flat mineral lens
- Dial: 250 x 250 mm

theMura – universal masters of energy-efficient lighting control

Theben theMura flush-mounted motion and presence detectors are suitable for universal use with the switch ranges of all leading manufacturers. The scope of supply depends on the respective switch range. The easy and flexible solution for energy-efficient lighting control!

For more information, see Page 160 or visit www.theben.de/theMura-en

theMura basic unit
(theMura S180 ... B UP)

Cover set,
available as an accessory
e.g. BJ adapter frame +
button cover
(Item no. 9070788)

Frame
(from switch manufacturer)
e.g. BJ balance SI frame
(not included
in scope of delivery!)

Thanks to their extra-flat design, these units have an especially unobtrusive appearance wherever they're installed. And due to the wide range of available accessory sets, they can be used for all popular switch ranges. Simply clever. Simply beautiful. Simply Theben.

Attractive and clever – the power of versatility

theMura wall detectors are perfect for energy-efficient lighting control, e.g. in corridors, stairways, cellars and toilets – available as a motion or presence detector version. When combined with a staircase light timer switch from Theben, the 2-wire detectors are absolutely ideal for renovations and conversions. The 3-wire detectors can also be used in new buildings and offer some handy additional functions, particularly when purchased as a presence detector.

Presence and motion detectors

Two in one: With integrated button

The lighting can be switched on and off manually using the integrated button. If the function is not required, simply deactivate it.

Perfectly safe: Staircase light function

With theMura, nobody trips up – not even on the stairs. The light can be switched on using the button, but it only goes off when there is no more movement on the stairs. This prevents you from being left in the dark because someone has turned off the lights.

Clever: Teach-in function

Lighting conditions change quickly – so it's good to be able to save them easily when they are exactly how you want them to be. With the teach-in function, the current lux value can be permanently saved. And this doesn't require the end user to have any specialist knowledge. It couldn't be easier.

Presence detector

Leading the way: Orientation light

The orientation light ensures greater safety in corridors and on staircases. After the main light has been switched off automatically, it remains activated for an adjustable time delay or permanently (depending on the brightness). Safety first.

Hear ye, hear ye: Acoustic function

In rooms like bathrooms, it can make sense to let the noise level decide whether the light should be switched off or not. With theMura, you can also set the time delay using the integrated microphone. It's pretty handy.

Remote controlled: Via remote control or app

You can access the full range of functions by using the theSenda B remote control in combination with the free theSenda Plug app.

Highlights at a glance

- Attractive, flat design
- Large detection area measuring 14 x 17 m
- Flexible extension thanks to master-slave concept
- Integrated button (can be deactivated)
- Thanks to accessory sets, theMura fits perfectly into the specified switch range

Original size – just 3 mm high!

Making light work of connections

DALI-2 presence sensors

Perfect light management can also be achieved with a higher-level control system and presence sensors. The DALI-2 standard ensures compatibility across manufacturers. This allows the DALI-2 presence sensors to be operated with any multi-master application controller that complies with IEC 62386 Parts 101/104.

As an input device, the presence sensor provides information regarding presence detection and light measurements in accordance with IEC 62386 Part 303 or Part 304 via the DALI bus. The higher-level control system is responsible for providing all the functions, such as switching, constant lighting control, fully/semi-automatic device, manual override and scenes.

DALI-2 presence sensors also support remote control commands for dimming or switching lamps, controlling blinds or other functions. The presence sensor sends this information via the DALI bus to the higher-level control system as per IEC 62386 Part 301. Using this information, the control system can trigger the desired actions.

Original size

- theRonda S360 DALI-2 S UP WH (50 m², approx. ø 8 m)
- theRonda P360 DALI-2 S UP WH (452 m², approx. ø 24 m)
- thePassa P360 DALI-2 S UP WH (135 m², □ 30 x 4.5 m)

For more information, see page 168 onwards

To make your DALI lighting control even smarter, we also offer DALI presence detectors. (from page 162)

Highlights of the DALI-2 presence sensors at a glance

- **Greater flexibility**, as the DALI-2 components can be altered at any time by reassigning them without the need for rewiring or programming.
- **More safety** thanks to interoperability of all DALI-2-components and mandatory certification.
- **Easier installation** of all DALI-2 components (ECGs, sensors, buttons) on one line reduces time and material costs.
- **Various installation options:** ceiling installation, ceiling surface-mounting or flush-mounting.
- **High security of investment:** standardisation ensures compatibility across manufacturers. This makes DALI-2 sensors easier to integrate. The DALI-2 standard is synonymous with high levels of compatibility and security.

Integrated lux meter!

The perfect solution – all from a single source

DALI-2 presence sensors offer a straightforward and reliable solution for rooms where lamps need to be dimmed or switched, blinds need to be controlled or other functions need to be performed via remote control.

theSenda B remote controls (9070985) have an **integrated lux meter**. This means that the brightness value at the desired measuring point is sent directly to the DALI-2 presence sensor. As a result, the brightness measurement is calibrated virtually automatically.

Presence and motion detectors/LED spotlights

Presence detectors, 230 V AC

Description

- Passive infra-red presence detector for ceiling installation
- Circular detection area 360°, up to Ø 8 m (50 m²)
- Automatic presence- and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Choice of fully or semi-automatic operation
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Test mode for checking function and detection area
- Connection option for sensor for manual switching
- Extension of detection area via Master/ Slave switching
- Ready for immediate use due to factory presetting
- Diameter of ceiling cutout 34–36 mm
- Remote controllable with optionally remote controls theSenda B, theSenda P and theSenda S

Presence and motion detectors/LED spotlights

Presence detectors, 230 V AC

Description

- Passive infrared presence detector for ceiling installation
- Circular detection area 360°, up to Ø 9 m (64 m²)
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Configurable brightness switching value, teach-in function
- Pulse function for staircase light timer switch
- Configurable time delay
- Configurable detection sensitivity
- Test mode for checking function and detection area
- Ready for immediate use due to factory presetting (brightness switching value 300 lux, time delay 10 minutes)
- One of these optional remote controls is required to change the values and settings:
 - theSenda B app remote control
 - theSenda P service remote control
 - Optional user remote control: theSenda S

Presence and motion detectors

Presence detectors, 230 V AC

Description

- Presence detector (PIR), with pre-configured cable and Wieland GSTi18 connector, cable length 1.50 meter
- Circular detection area 360°, up to Ø 9 m (64 m²)
- Automatic motion and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Detection sensitivity configurable
- Test mode for checking function and detection area
- Ready for immediate use due to factory presetting (Brightness switching value 300 lux, Time delay 10 min)
- One of these optional remote controls is required for changing the values and attitudes:
 - Management remote control theSenda B
 - Installation remote control theSenda P
 - Optional user remote control: theSenda S

Presence detectors, 230 V AC

Description

- Passive infrared presence detector for ceiling mounting
 - Round detection area 360°, up to Ø 9 m (64 m²)
 - Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
 - Channel A, light: relay, 230V
 - Choice of fully or semi-automatic operation
 - Adjustable brightness switching value, teach-in function
 - Reduction of switch-off delay time in the event of short presence (brief-presence)
 - Connection option for sensors or switches for manual switching with automatic recognition of sensor/switch
 - Pulse function for staircase light time switch
 - Switch-on delay and switch-off delay configurable
 - Sensitivity adjustable
 - Detection area can be limited using cover clip
 - Ready for immediate use due to factory preset
 - An optional remote control is required for changing the values and attitudes
 - Test mode for checking function and detection area
 - Ceiling installation in flush-mounted socket
 - Ceiling installation also possible with surface-mounted frame

Presence and motion detectors/LED spotlights

Presence detectors, 230 V AC

Description

thePrema P360-101 E

- Passive infrared presence detector for ceiling mounting
- Square detection area 360° (up to 100 m²) for reliable and easy planning
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Light measurement can be switched to spot or wide measurement
- Channel A, light: relay, 230 V
- Choice of fully or semi-automatic (absence detection) operation
- Adjustable brightness switching value, teach-in function
- Self-learning time delay
- Reduction of switch-off delay time in the event of short presence (brief-presence)
- Connection option for sensors or switches for manual switching with automatic recognition of sensor/switch
- Pulse function for staircase light time switch
- Channel H, presence: relay, floating e.g. for HVAC control

- Switch-on delay and switch-off delay configurable
 - Room monitoring with selective movement detection
 - Exceptionally easy configuration of the energy-saving behaviour with the new «eco plus» function
 - Staircase time function
 - Operating mode of light and presence relay can be flexibly selected using the remote control theSenda B
 - User remote control theSenda S, management remote control theSenda B (optional)
 - Ready for immediate use due to factory preset
 - Test mode for checking function and detection area
 - Extension of detection area via Master/Slave or Master/Master switching, a maximum of 10 detectors can be switched in parallel with each other
 - Ceiling installation in flush-mounted socket
 - Ceiling installation also possible with surface-mounted frame
- thePrema P360 Slave E**
- Slave version for thePrema
 - Just to be used with thePrema as Master

* According to guarantee conditions, see www.theben.de/en/guarantee

Presence and motion detectors/LED spotlights

Presence detectors, 230 V AC

PresenceLight 180

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Cover frame in white included in delivery, cover frames in black or silver available as optional accessories
- IP 54 for versatile use
- Light switch output (relay, 230 V)
- Mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Brightness threshold and self-learning switch-off delay adjustable
- Pulse function for staircase time switch
- Parameters can be set using the potentiometers or via the optional service remote controls
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Wall mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

Description

Common functions

- Passive infrared motion/presence detector for flush-mounted wall mounting
- Semicircular detection area 170°, up to 14x17 m
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LEDs
- Integrated button (can be blocked)
- Available with Theben frame or without frame
- Adapter frames for common switch ranges available as accessory, see www.theben.de/theMura

theMura S180-100 UP WH (with Theben frame) theMura S180-100 B UP (without frame)

- Motion detector,
- 1 channel light
- Fully or semi-automatic operation
- Adjustable brightness switching value, teach-in function
- Staircase light function
- Switch-on delay configurable
- Extension of detection area via master / slave switching
- Ready for immediate use due to factory presetting

theMura S180-101 UP WH (with Theben frame)

theMura S180-101 B UP (without frame)

- Presence detector
- 1 channel light
- 1 channel presence
- Fully or semi-automatic operation
- External button can be connected
- Adjustable brightness switching value, teach-in function
- Automatic calibration of brightness measurement
- Switch-on delay configurable
- Short-term presence
- Acoustic function
- Orientation light
- Configurable sensitivity
- External button can be connected
- Staircase light function
- Extension of detection area via master / slave switching
- Ready for immediate use due to factory presetting
- Remote operation with theSenda S, theSenda P, theSenda B

theMura S180 Slave UP WH

(with Theben frame)

theMura S180 Slave B UP (without frame)

(with Theben frame)

theMura S180-100 2W B UP (without frame)

- Motion detector
- 1 channel light
- 2-wire version in combination with an ELPA staircase time switch for switching the lamp loads
- Adjustable brightness switching value, teach-in function
- Ideal for replacing existing buttons
- Switch-on delay configurable on the staircase time switch
- Parallel connection possible (up to 12 detectors towards an ELPA)

Application example

Presence and motion detectors/LED spotlights

Presence detectors, DALI

Description

- Passive infrared presence detector for ceiling mounting
- Square 360° detection range for an accurate and simple planning
- DALI interface in accordance with EN 62386 for max. 25 DALI electronic ballasts
- Automatic allocation of DALI participants (DALI Broadcast)
- Automatic lighting regulation with constant light control
- Mixed light measurement suitable for switching fluorescent lamps (FL/PL), halogen and incandescent lamps as well as LEDs
- Facility to connect a push button for manual dimming and switching (single-button control)
- Fully or semi-automatic operation switch-selectable
- Brightness switching level, self-learning switch-off delay time, stand-by time and stand-by brightness can be adjusted
- Scene component with two built-in scenes
- Ready for immediate use due to factory preset
- Test mode for checking function and detection area
- Extension of detection area via Master/Slave or Master/Master switching, a maximum of 10 detectors can be switched at the same time
- Ceiling installation in flush-mounted socket
- Ceiling installation possible with surface-mounted frame
- User remote control theSenda S (option)
- Service remote control theSenda B (option)

Presence and motion detectors/LED spotlights

Presence detectors, DALI-2

Description

- Passive infrared presence detector for ceiling mounting, DALI-2 certified
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- Up to 2 light channels DALI-2 addressable or 1 light channel DALI-2 in Broadcast mode
- DALI-2 technology according to IEC 62386 Parts 101 and 103
- Flexible assignment of up to 2 light groups towards one DALI line
- Easy, intuitive configuration of the DALI groups
- Up to 2 push-button inputs
- Using of conventional push-buttons for maximum design freedom
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Choice of fully or semi-automatic operation
- Easy integration of an external DALI relay by an additional group e.g. for HVAC applications possible
- Adjustable brightness switching value
- Teach-in function via remote control or push-button
- Setting of room correction factor (Automatic adjustment of brightness measurement)
- Light time delay can be set
- Calibrated 2 channels light measurement
- Brief-presence
- Self-learning time delay
- Extremely easy setting of energy saving characteristics with the new „eco plus“ function
- Selectable control speed
- Manual override via remote control or pushbutton
- Behavior after push button operation selectable (school / office)
- Test mode light
- Test-Mode presence
- Remote-controllable
- Scenes
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Extension of detection area via Master/ Slave or Master/Master switching
- Optimized handling by installer during assembly, wiring, commissioning

Presence and motion detectors/LED spotlights

Presence sensors, DALI-2

Description

- Passive infrared presence sensor for ceiling installation, DALI-2 certified
- This device provides information about presence and brightness in the form of a DALI telegram in line with IEC 62386 Part 303/304
- Easy to calibrate brightness measurement
- Test mode for checking function and detection area
- Configurable detection sensitivity
- Can be configured via DALI bus or remote control
- The "theSenda S" or "theSenda B" user remote controls can be used to dim or switch the lamps, to control the blinds or to execute additional functions via the higher-level control system.
- Ceiling installation in flush-mounted box
- Surface mounting on ceilings possible with 110A back box (option)
- Area restriction with cover clips (optional)
- "theSenda B" app remote control (optional) and corresponding "theSenda Plug" app (for iOS/Android)
- A Multi-Master Application Controller is required for start-up/control and configuration. It must be in accordance with IEC 62386 Parts 101/103 and, optionally, 301/303/304

theRonda P360 DALI-2 S UP WH

- Circular detection area 360°, up to Ø 25 m (491 m²)
- 3-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 1 instance for presence
- 4 instances for brightness – integral/interior/centre/window

theRonda S360 DALI-2 S UP WH

- Circular detection area 360°, up to Ø 9 m (64 m²)
- 1-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 1 instance for presence
- 1 instance for brightness

Presence and motion detectors/LED spotlights

Presence sensors, DALI-2

Description

- Passive infrared presence sensor for ceiling installation, DALI-2 certified
- This device provides information about presence and brightness in the form of a DALI telegram in line with IEC 62386 Part 303/304
- Rectangular detection area 360°, up to 30 x 5 m (150 m²), for reliable and easy planning
- 3 instances for presence – detection area zone 1 + 2/zone 1/zone 2
- 2-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- 3 instances for brightness – detection area zone 1 + 2/zone 1/zone 2
- Easy to calibrate brightness measurement
- Test mode for checking function and detection area
- Configurable detection sensitivity
- Can be configured via DALI bus or remote control
- The "theSenda S" or "theSenda B" user remote controls can be used to dim or switch the lamps, to control the blinds or to execute additional functions via the higher-level control system.
- Ceiling installation in flush-mounted box
- Surface mounting on ceilings possible with 110A back box (option)
- Area restriction with cover clips (optional)
- "theSenda B" app remote control (optional) and corresponding "theSenda Plug" app (for iOS/Android)
- A Multi-Master Application Controller is required for start-up/control and configuration. It must be in accordance with IEC 62386 Parts 101/103 and, optionally, 301/303/304

Presence and motion detectors/LED spotlights

Presence sensors, DALI-2

Description

- Passive infrared presence sensor for ceiling installation, DALI-2 certified
- This device provides information about presence and brightness in the form of a DALI telegram in line with IEC 62386 Part 303/304
- Square detection area 360°, up to 8 x 8 m (64 m²), for reliable and easy planning
- 2 instances for presence
- Standard/reduced detection zone
- Optics can be tilted to adjust the detection area
- 3-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 4 instances for brightness - interior/centre/window/integral
- Easy to calibrate brightness measurement
- Test mode for checking function and detection area
- Configurable detection sensitivity
- Can be configured via DALI bus or remote control
- The „theSenda S“ or „theSenda B“ user remote controls can be used to dim or switch the lamps, to control the blinds or to execute additional functions via the higher-level control system.
- Flat design with interchangeable bezel frame in different colours
- Ceiling installation in flush-mounted box
- Surface mounting on ceilings possible with surface frame 75B (option)
- Area restriction with cover clips (optional)
- „theSenda B“ app remote control (optional) and corresponding „theSenda Plug“ app (for iOS/Android)
- A Multi-Master Application Controller is required for start-up/control and configuration. It must be in accordance with IEC 62386 Parts 101/103 and, optionally, 301/303/304

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

Common functions

- KNX Passive infrared presence detector for ceiling mounting
- Square detection range of 360° for safe and easy planning
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value

- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Self-learning time delay
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Extremely easy setting of energy saving characteristics with the new „eco plus“ function
- Test mode for checking function and detection range
- Parallel switching of several detectors in Master/Slave or Master/Master possible

- User remote control and management-remote control (optional)
- Room monitoring

thePrema P360 KNX UP

- 3 channels light and 2 channels presence
- 2 channels light C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- 2 presence channels can be set individually
- Adaptable 3 channels light measurement

thePrema S360 KNX UP

- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measurement
- 2 presence channels can be set individually with parallel offset
- Adaptable 1 channel light measurement

* According to warranty terms and conditions, see www.theben.de/en/guarantee

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

- KNX multisensor
 - Consisting of KNX passive infrared presence detector and room air sensor (= 2 bus sharing units)
- Room air sensor functions**
- Measures CO₂ concentration, relative humidity, temperature and air pressure
 - Three independent, configurable thresholds for CO₂ concentration and relative humidity
 - Integrated room thermostat
 - 4 binary inputs
- Presence detector functions**
- Automatic presence and brightness-dependent control for lighting and HVAC
 - Square detection area 360°, up to 10 x 10 m (100 m²), for reliable and easy planning
 - 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without influence of brightness
 - 2 presence channels C4, C5 can be programmed individually
 - Adaptable 3-channel light measurement
 - Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL), halogen and incandescent lamps
 - Operation as fully or semi-automatic device, switchable
 - Switching operation or constant light control with standby function (orientation light)
 - Lighting dimmable in switching mode with standby function
- Brightness switching value or set point value configurable in lux using parameters, object or remote control
 - Teach-in of the brightness switching value or set point value
 - Setting of the room correction factor for brightness measurement calibration
 - Light time delay configurable using parameters, object or remote control
 - Configurable switch-on delay and presence time delay
 - Configurable detection sensitivity
 - Self-learning time delay
 - Reduced time delay in the event of short presence
 - Room monitoring function with reduced sensitivity only for detection of walking persons
 - Scene functionality
 - Extremely simple adjustment of energy saving behaviour with "eco plus" function
 - Test mode for checking function and detection area
 - Parallel switching of multiple presence detectors (master/slave or master/master)
 - Room monitoring
 - Remote operation with the following remote controls:
 - theSenda B app remote control
 - theSenda P service remote control
 - theSenda S user remote control

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

PlanoSpot 360 KNX DE WH

- Passive infrared presence detector for ceiling installation
- Flat design, cover frame in white included in delivery
- Square detection area 360° (up to 64 m²) for reliable and easy planning
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Two differently sized detection zones for greater flexibility. Adjustable via parameters or remote control.
- Manual alignment of the detection area (swivel mechanism)
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- 3 directed light measurements
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- Switched or constant light control with 2 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Fully or semi-automatic
- Brightness switching value or set point value can be set in lux by using parameters, the object or via remote control
- Teach-in of the brightness switching value or the set point value
- Light time delay configurable
- Self-learning time delay can be set using parameters, object or via remote control
- Reduction of time delay when present briefly (short-term presence)
- Manual override by telegram or remote control
- 2 presence channels C4, C5, individually configurable
- Switch-on delay and time delay configurable
- Room monitoring with selective movement detection
- Setting the room correction factor for brightness measurement comparison
- Configurable sensitivity
- Extremely simple setting of the energy-saving ratio with the new «eco plus» function
- Test mode for checking function and detection area
- Scenarios
- Parallel switching of multiple presence detectors (Master/Slave or Master/Master)
- Installation in false ceilings with springs
- Surface mounting on ceilings possible with surface frame (optional)
- User remote control «theSenda S» (optional)
- Management remote control «theSenda B» (optional)
- Installation remote control «theSenda P» (optional)

Presence detectors KNX

Description

- KNX Passive infrared presence detector for ceiling mounting
- Round detection area 360°, up to Ø 24 m (452 m²)
- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measurement
- 2 presence channels can be parametrized individually
- Adaptable 1 channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

- KNX Passive infrared presence detector for ceiling installation
- Circular detection area 360°, up to Ø 9 m (64 m²)
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Mixed light measurement suitable for fluorescent (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- 2 light channels C1, C2
- Switching operation or constant light control with standby function (orientation light)
- Switching mode with dimmable lighting
- Choice of fully or semi-automatic
- Brightness switching value or set point value can be set in lux by using parameters, the object or via remote control
- Teach-in of the brightness switching value or the set point value
- Reduction of time delay when present briefly (short-term presence)
- Manual override by telegram or remote control
- 2 presence channels C4, C5, individually configurable
- Switch-on delay and time delay configurable
- Setting the room correction factor for brightness measurement comparison
- Adjustable sensitivity
- Test mode for checking function and detection area
- Scenes
- Parallel switching of multiple presence detectors (Master/Slave or Master/Master)
- User remote control «theSenda S» (option)
- Management remote control «theSenda B» (option)
- Installation remote control «theSenda P» (option)

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

- KNX Passive infrared presence detector for ceiling mounting
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- 2 channel light and 2 channel presence
- 2 channel light C1, C2 with 2 light measurements
- 2 presence channels can be parametrized individually
- Adaptable 2 channel light measurement
- Function aura effect, switches on the lighting group when there is a person in its detection area and dims the adjacent lighting groups
- Function chaser light, recognises the direction of movement of the people in the room and „predictively“ switches on the adjacent lighting group
- Function walking direction recognition
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

Presence and motion detectors/LED spotlights

Presence detectors KNX

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Square detection area allows accurate and simple planning
- IP 54 for versatile use
- 2 channels light for controlling one or two lighting groups
- Mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Switching or constant light control with stand-by function
- Adjustable sensitivity
- Choice of fully or semi automatic operation: In „Semi-automatic“ mode the light must be switched on manually and switches off automatically
- Short presence; Reduced switch-off delay time in case of a short presence
- Self-learning time delay
- Channel presence with switch-off delay and switch-on delay time and send values
- Function „monitoring“ with reduced sensitivity only to detect walking persons
- Channel brightness (Lux)
- Set brightness level via bus object
- Scene functionality (8-bit scenes)
- Selected parameters can be configured remotely using the theSendä B remote control. Parameter settings are made via ETS
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Parallel switching of several presence detectors (master-slave or master-master) possible
- Ceiling mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

Motion detectors

Description

- Passive infra-red motion detector for ceiling installation
- Circular detection area 360°, up to Ø 8 m (50 m²)
- Automatic motion and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Extension of detection area via Master/ Slave switching
- Test mode for checking function and detection area
- Diameter of ceiling cutout 34–36 mm
- Ready for immediate use due to factory presetting

- Automatic motion and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/ incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Detection sensitivity configurable
- Ready for immediate use due to factory presetting
- Test mode for checking function and detection area
- Ceiling installation in flush-mounted socket
- Ceiling installation possible with back box, IP44 (option)
- User remote control theSenda S (option)
- Management remote control theSenda B (option)
- Installation remote control theSenda P (option)

Presence and motion detectors/LED spotlights

Motion detectors

LUXA 103 DE

LUXA 103 AP

Description

Common functions

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LED
- Zero-cross switching for relay-saving switching and high lamp loads
- Easy installation via two clamping brackets
- Large clamping area for quick installation
- Single-handed plug-in installation with captive screws
- Instant start-up possible via factory preset

- No unintentional adjustment due to covered up controls

- Adjustable brightness switching value and switch-off delay

LUXA 103-100 DE

- 1 channel
- System consists of power box and sensor with plugged connection cable

LUXA 103-101 DE

- 2 channels
- 2. Relay for HVAC control with adjustable switch-off delay, presence-dependent, potential-free

- HVAC control with programmable switch-off delay

- System consists of power box and sensor with plugged connection cable

Presence and motion detectors/LED spotlights

Motion detectors

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- 1 channel
- With acoustic function
- Activation by the PIR sensor and deactivation by the microphone (microphone can also be deactivated)
- Flexible installation options, ceiling installation using clamping brackets as well as flush-mounted or surface mounting using the optional surface frame
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LED
- Zero-cross switching
- Detection area can be limited using three enclosed segments
- Instant start-up possible via factory preset
- No unintentional adjustment due to covered up controls
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced to limit detection area
- Pulse function
- Test function

Presence and motion detectors/LED spotlights

Motion detectors

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- 2 wire connection, ideal for retrofitting
- Light switch output (triac, 230 V AC)
- Mixed light measurement suitable for incandescent and halogen lamps (no electronic ballast)
- Advance shut-off warning through dimming 15 seconds before light switches off
- Wall installation
- Compatible with branded switches, replaces conventional light switches
- Area limit via lens attachment
- Manual AUTO/ON/OFF switching by simple adjustment of cover flap
- Teach-in of current brightness value
- Instant start-up possible via factory preset
- No unintentional adjustment due to covered up controls
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced to limit detection area
- Pulse function

LUXA 103-200 T

A clear line theLuxa R, S and P motion detectors

Most people wouldn't even notice them. Or only at the point when the light comes on, a feeling of safety abounds and everyone can see the way: theLuxa motion detectors from Theben.

They contribute decisively to saving energy as well as increasing comfort and safety. The light is automatically switched on when needed, and only then. theLuxa always shows its best side – whether in white (WH) or in black (BK). Whatever wall it is on. Or even on the ceiling – thanks to the swivel joint on some versions.

theLuxa is available in the standard versions R180, S150/S180 and S360, or as a remote-controlled Performance version with floating contacts for simple, time-saving and thus inexpensive integration into KNX building system technology. For further information and technical data, see the pages that follow.

Motion detectors, outdoor

Description

Common functions

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- For outdoor use
- For installation on walls and ceilings
- Additional creep under protection
- For larger, commercial outdoors properties such as offices, public buildings, hotels, schools, car parks and warehouses
- Adjustable brightness switching value and switch-off delay
- Sensor head can be turned by $\pm 90^\circ$ horizontally, by 45° downwards and by 90° upwards
- Remote-controllable

- Sensitivity can be reduced to limit detection area
- Area limit via lens attachment
- Potential-free relay with tungsten pre-contact for relay-saving switching and high lamp loads
- Teach-in of current brightness value possible
- Pulse function
- Test function for checking detection area
- Installation on flush-mounted socket possible (60 mm)
- Single-handed plug-in installation
- Instant start-up possible via factory preset
- Controls are place protected

- Terminal for protective earth conductor
- Switching of FELV (Functional Extra Low Voltage) possible

Uniform yet diverse: theLeda D LED light

Whether you are looking for indirect lighting for your house facade or impressive illumination for your garden, front door or patio, you need look no further than theLeda D. With their matt anodised aluminium housing and pleasant warm white light, these LED lights look stunning wherever they are used.

The theLeda D line offers you plenty of flexibility. You can choose between direct lighting with LED spotlights, indirect lighting with uplighters and downlighters and two bollard lights in different lengths. There is also the option of a practical socket on the rear. And the best part is that no matter which model you opt for, you are always guaranteed a uniform look for your home. All theLeda D models are available with or without an integrated motion detector. Further information and technical data on page 236 onwards.

Presence and motion detectors

LED spotlights, Motion detector/light sensor as accessory

theLeda B20L WH

theLeda B30L BK

theLeda B100L WH

Description

Common functions

- LED spotlight
- Suitable for outdoor use
- Flexible extension options thanks to optional module with motion detector including switch output or light sensor incl. switch output
- Spotlight can be turned by 360°
- Not dimmable

theLeda B20L

- 20 W LED spotlight

theLeda B30L

- 30 W LED spotlight

theLeda B50L

- 50 W LED spotlight

theLeda B100L

- 100 W LED spotlight

theLeda B motion module RC

- theLeda B radio-controlled motion detector module
- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can be turned horizontally by $\pm 90^\circ$ and downwards/backwards by 90°
- IP 55 protection rating
- theLeda B remote control included in scope of supply for the motion detector module
- A remote control can be combined with different motion detector modules
- Up to 6 remote controls can be combined with a single motion detector module
- Remote control range up to 100 m on open air test site

theLeda B motion module

- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can be turned horizontally by $\pm 90^\circ$ and downwards/backwards by 90°
- Protection rating IP 55

theLeda B light module

- Duty cycle range: 2, 4, 6, 8 hours, on/permanent on at night
- Switch-on brightness can be set from 2–200 lux
- Additional light switch output
- Protection rating IP 55

Presence and motion detectors

Spotlights, with motion detector

Description

Common functions

- LED spotlight with motion detector
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle at a detection range of 10 m
- Area limit via lens attachment
- Orientation light with configurable dimming level

- Short and extended function via manual control system
- Integrated heat sink in housing color
- Single-handed plug-in installation
- Instant start-up possible via factory preset
- Adjustable lux value and switch-off delay
- Setting elements easily accessible on the side

theLeda S10

- 1 LED spot with 10 W

- Spotlight can be swivelled $\pm 40^\circ$ horizontally, and adjusted 70° downwards, wall-wash functionality by swivelling 180°

theLeda S20

- 2 LED spot with 10 W each
- Spotlights can be swivelled $\pm 20^\circ$ horizontally, and adjusted 70° downwards

Presence and motion detectors

Spotlights, with motion detector

Description

Common functions

- LED light with motion detector
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle at a detection range of 12 m and creep under protection
- Diffused glare-free light
- Functions teach-in, test, twilight switch, dimmable orientation light and night interruption adjustable
- Area limit via lens attachment

- Controls are place protected
- Remote controllable with optionally remote controls theSenda P and theSenda S
- Back side made of high-quality aluminum die-cast for an optimally cooling of the high-power LEDs

theLeda P12

- 11 W (900 lm)
- Spotlight can be swivelled 35° left/right, 60° upwards/downwards and 180° backwards
- Spacer included in delivery

theLeda P24

- 20 W (2 x 900 lm)
- Spotlight can be swivelled 30° backwards, 60° downwards
- Spacer and corner angle included in delivery

Presence and motion detectors

LED bollard light, with/without motion detector

Description

Common functions

(theLeda D with motion detector)

- Stylish LED bollard light with motion detector (PIR)
- High-quality housing made from anodised extruded-aluminium profiles
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle with 12 m diameter, optimised for paths
- Teach-in, test, twilight switch, dimmable orientation light and self-calculating night interruption functions can be adjusted
- Can be adjusted via the theSenda S and P remote controls, via theSenda B and the theSenda Plug app, or by setting the potentiometer on the device itself
- High IP 55 protection rating for outdoor installation (with IP 54 socket)

- Wireless connectivity, can only be set via theSenda B with theSenda Plug
- Exceptionally efficient thanks to high light output
- Long-lasting LEDs: service life of 50,000 hours
- Manual control via an interrupter switch (PERM ON 6 h)

theLeda D B AL

- 8,5 W short LED bollard light
- Light emission at front (spotlight)

theLeda D B plus AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)

theLeda D B plus S AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)
- With socket on the back of the housing

Common functions

(theLeda D without motion detector)

- Stylish LED bollard light
- High-quality housing made from anodised extruded-aluminium profiles
- Suitable for outdoor use
- High IP 55 protection rating for outdoor installation
- Wireless connectivity, can only be set via theSenda B with theSenda Plug
- Exceptionally efficient thanks to high light output
- Long-lasting LEDs: service life of 50,000 hours

theLeda D BL AL

- 8,5 W short LED bollard light
- Light emission at front (spotlight)

theLeda D BL plus AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)

top3 is ready to move: out of the control cabinet and into the switch range itself

Now you can enjoy all the familiar benefits of the DIN rail-mounted devices from the top3 Performance range in a new flush-mounting version. The new top3 flush-mounted digital time switches fit in elegantly with different switch ranges while offering all the functionality of the top3 Performance range.

For more information, see page 256 onwards

Time and light control

Digital time switches, DIN rail, 2 modules

TR 610 top3

TR 612 top3

TR 612 top2

Description

Common functions

- Digital time switch with weekly program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 56 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- ON-OFF switching times
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter

- Holiday program
- Display back light (can be turned off)
- PIN coding
- Automatic summer/winter time changeover

TR 610 top3

- 1 channel
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

TR 612 top3

- 2 channels
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

TR 610 top2

Description

Common functions

- Digital time switch with weekly program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 84 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- ON-OFF switching times
- Pulse program
- Cycle program
- Switching preselection
- Permanent switching ON/OFF
- Timer countdown
- Integrated operating hour counter
- Holiday program
- 2 random programs
- Display back light (can be turned off)
- PIN coding
- Automatic summer/winter time changeover

Functions top3 devices

- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

TR 611 top3

- 1 channel, external input
- 3 special programs (small annual program)
- 84 memory locations

TR 611 top3 RC

- Time synchronisation option via connection of an external DCF or GPS antenna (GPS not with 24 V device)
- Additional power unit required for GPS if only one device is connected to the antenna
- 1 channel, external input
- 3 special programs (small annual program)
- 84 memory locations

TR 611 top3

- 2 channels, 2 external inputs
- 3 special programs (small annual program)
- 84 memory locations
- Channel switching and channel locking possible

TR 611 top2

- 1 channel
- External input
- 84 memory locations

TR 622 top2

- 2 channel
- 2 external inputs
- 84 memory locations

Time and light control

Digital time switches, DIN rail, 2 modules

SELEKTA 170 top3

SELEKTA 174 top3

SELEKTA 175 top2

Description

Common functions

- Astronomical time switch with weekly program
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- Calculated astronomical switching times
- Programmable ON-OFF switching times
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter
- Holiday program
- Display back light (can be turned off)
- PIN coding
- Automatic summer/winter time changeover

Functions top3 devices

- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

SELEKTA 170 top3

- 1 channel
- 56 memory locations

SELEKTA 174 top3

- As SELEKTA 170 top3, but:
- 2 channels

SELEKTA 171 top3 RC

- Time synchronisation via connection of external DCF or GPS antennas, additional positioning for astronomical program with GPS (GPS not with 24 V device)
- 1 channel, external input
- 3 special programs (small annual program)

- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse, 84 memory locations

SELEKTA 172 top3

- 2 channels, 2 external inputs
- 3 special programs (small annual program)
- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse, 84 memory locations
- Channel switching and channel locking possible

SELEKTA 172 top3 RC

- As SELEKTA 171 top3 RC, but:
- 2 channels, without external inputs

SELEKTA 170 top2

- 1 channel
- 56 memory locations

SELEKTA 175 top2

- 1 channel
- 56 memory locations
- External input

Time and light control

Digital time switches, DIN rail, 3 modules, 4 modules

Description

Common functions

- Digital time switch with yearly and astronomical time program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 800 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 8 year power reserve (lithium battery)
- Zero-cross switching for leay-saving switching and high lamp loads (not with 24 V devices)
- Automatic summer/winter time changeover
- ON-OFF switching times
- Pulse program
- Cycle program
- Extensive yearly clock functions
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Switching preselection

- Permanent switching ON/OFF
- Count-down timer
- Integrated operating hour counter
- Holiday program
- 2 random programs
- Display back light (can be turned off)
- PIN coding

TR 641 top2

- 1 channel
- External input

TR 641 top2 RC

- Time synchronisation via connection of external DCF or GPS antennas, additional positioning for astronomical program with GPS
- 1 channel
- External input
- Extension module can be connected
- Memory card OBELISK top2 included in delivery

TR 642 top2

- 2 channels
- 2 external inputs

TR 642 top2 RC

- As TR 641 top2 RC but:
- 2 channels
- 2 external inputs

TR 644 top2

- 4 channels
- 4 external inputs

TR 644 top2 RC

- As TR 641 top2 RC but:
- 4 channels
- 4 external inputs

Time and light control

Digital time switches, DIN rail, LAN time switch, 4 modules

TC 649 E

Description

- Digital time switch / astro time switch with weekly program and annual program
- With integrated webserver, can be controlled via LAN / smartphone
- 4 channels
- 800 memory programs
- Channel 1 to 4 can be switched over as time or astro time switch program
- 3 special programs per channel: switching program / astro program; Duration Off; Duration Each with year date function
- Local holidays, fixed date ranges, recurring date ranges and Easter-themed holidays
- Astro times with other night interruption / fixed ON circuit
- Permanent ON or OFF switching via LAN switchable
- Pulse program
- Automatic summer winter time changeover Europe; Canada; UNITED STATES; Iran, Australia and freely definable
- Deactivate summer / winter time change over
- Hour counter

Type	Article number
TC 649 E	6490130

Technical data

	TC 649 E
Operating voltage	230 V AC
Frequency	50–60 Hz
Width	4 modules
Installation type	DIN rail
Switching capacity at 250 V AC, $\cos \phi = 1$	6 A
Stand-by consumption	3 W
Type of protection	IP 30
Protection class	II according to EN 60 730-1
Ambient temperature	-25 °C ... +55 °C

TR 608 top2 S

TR 609 top2 S

SELEKTA 175 top2

Description

Common functions

- 1 channel
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Switching preselection
- Integrated operating hour counter
- Holiday program
- PIN coding
- Automatic summer/winter time changeover

TR 608 top2 S

- Digital time switch with weekly program
- 56 memory locations
- ON-OFF switching times
- Permanent switching ON/OFF

TR 609 top2 S

- Digital time switch with weekly program
- 84 memory locations
- External input
- Pulse program
- Cycle program
- Timer countdown
- 2 random programs
- ON-OFF switching times
- Permanent switching ON/OFF

SELEKTA 175 top2

- Astronomical time switch with weekly program
- External input
- 56 memory locations
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Offset for adjusting of sunrise and sunset times
- Calculated astronomical switching times
- Fixed ON-OFF switching times can be programmed (e.g. night time interruption)
- Permanent switching ON/OFF

Digital time switches, Wall installation

TR 030 top3 UP

SELEKTA 070 top3 UP

Description

Common functions

- Digital time switch with weekly program for flush-mounted wall mounting
- 1 channel
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 3 special programs (small annual program)
- 84 memory locations
- DuoFix spring terminals
- Text-oriented user guidance in display
- 6 year power reserve

- Interface for OBELISK top2 memory card (PC programming)
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter
- Holiday program
- PIN coding
- Automatic summer / winter time changeover
- Adapter frames for common switch ranges available as accessory

TR 030 top3 UP

- Digital time switch with weekly program
- Pulse program
- Cycle program
- Random program

SELEKTA 070 top3 UP

- Astronomical time switch with weekly program
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Offset to adjust sunrise and sunset times
- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse
- Programmable ON-OFF switching times, for example for night interruption

theben-timer 26

It just keeps on running

There is one product that captures the development and success of our company better than almost any other: the theben-timer 26. This analogue plug-in time switch was launched in 1977, bringing automatic timers into more than 30 million homes. It is an early example of energy awareness that appeared well before the word sustainability was on anyone's lips – and certainly before any of the associated implications came into play.

For more information, see page 279

More than
30 million
units have
been sold
and are
helping to
achieve
energy
savings.

ELPA 8

Getting you safely up and down the stairs

Tried and tested millions of times over

The production figures speak for themselves – millions of ELPA 8 units have been produced and put into service over the past few years.

5 year warranty*

0 W standby

With features such as the following, it is little wonder that the ELPA 8 is the best selling staircase light timer switch on the market: incredibly easy time setting, an absolute scale that allows you to read the delay time directly and 0 W consumption during standby.

0 Watt 0 W standby power

The ELPA 8 consumes 0 W of power during standby operation so it saves energy as well.

Simple setting

The ELPA 8 features a rotary control with an absolute scale, making it really easy for you to see, access and change the settings.

5 5 year warranty

The ELPA 8 stands out thanks to its top quality and reliability. And it comes with a five-year warranty.

Reliable: Install and forget all about it

Due to the stringent testing requirements at our in-company laboratory (e.g. 40,000 switching cycles), we more than meet the standard. This quality is also confirmed by an external VDE test. The brand on the outside is what is being installed!

Toggle switch for continuous light

The toggle switch allows you to change the setting to continuous light with a simple flick of the finger. And that means no more fumbling around in the dark when you are trying to cleaning the stairs, for example.

Cadmium-free contacts

We use environmentally friendly AgSnO₂ materials for our switching contacts. These offer very good contact and switching properties, such as higher burn-off resistance, increased welding resistance and a significantly reduced tendency towards material migration during direct current operation.

For technical details, see page 286 onwards.

* In accordance with the warranty conditions, see www.theben.de/guarantee

Optimised for LEDs

LED behaviour can vary significantly. To respond to this correctly, it's good to have a safe and reliable solution, such as the ELPA 6 plus from Theben (page 288).

You can find additional products and versions at www.theben.de/elpa-en

Time and light control

Staircase time switches, DIN rail, electronic with multi-function, Electronic

Description

Common functions

- Staircase time switch, electronic
- Terminal layout same as ELPA 8
- Extremely accurate
- Push button input with electronic overload protection
- Automatic 3 or 4 conductor detection (4 conductor with connection for floor lighting, 3 conductor no longer permitted for new systems)

ELPA 1

- Zero-cross switching for relay-saving switching and high lamp loads
- Multi-functional device with 10 available functions, set at the front of the device
- Additional multi-voltage input electrically isolated for AC/DC 8...240 V, e.g. für inter-coms
- Switch-off pre-warning (two double flashes) in accordance with DIN 18015-2 to avoid sudden darkness

- Extended function activated via long button press
- Immediate secondary switching (stair light switch) or prematurely switched off (pulse switch with switch-off delay)
- Permanent switch
- Electronic pulse light

ELPA 6

- Zero-cross switching for relay-saving switching and high lamp loads
- Multi-functional device with 10 available functions, set at the front of the device
- Switch-off pre-warning (two double flashes) in accordance with DIN 18015-2 to avoid sudden darkness
- Extended function activated via long button press
- Immediate secondary switching (stair light switch) or prematurely switched off (pulse switch with switch-off delay)
- Permanent switch
- Electronic pulse light

ELPA 6 plus

As ELPA 6 but:

- Switch-off pre-warning (two flashes) optimized for switching LEDs

ELPA 3

- Additional multi-voltage input electrically isolated for AC/DC 8...240 V, e.g. für inter-coms
- Immediate secondary switching
- Toggle switch for permanent light

ELPA 7

As ELPA 3 but:

- Without multi-voltage input

Time and light control

Staircase time switches, DIN rail, Electro-mechanical

Description

Common functions

- Staircase time switch, electro-mechanical
- No closed-circuit current consumption
- Toggle switch for permanent light ON
- Reliable due to synchronous motor drive
- Simplest possible time setting and direct delay time readout on absolute scale
- Precision mechanics and therefore exact switching period
- Very low sensitivity to interference

* According to guarantee conditions, see www.theben.de/en/guarantee

ELPA 8

- 4 conductor with floor lighting connection
- 3 conductor without floor lighting (no longer permitted for new systems)
- Retriggerable

ELPA 9

- 3 conductor connection and floor lighting, but without secondary switching (no longer permitted for new systems)
- Terminal layout same as ELPA 8

Premium class!

DIMAX 544 plus P

Flush-mounted universal dimmer

Minimum width. Maximum power.

Thanks to the compact housing measuring just 44 x 44 x 20 mm, the new DIMAX can be quickly mounted in the flush-mounted box, even behind a switch.

The DIMAX 544 plus P boasts a whole range of setting options for various LED dimming responses as well as convenient programming via the smartphone app.

Compact housing

For convenient installation in the flush-mounted box

Ideal for LEDs

Thanks to optimised zero-cross switching

Handy memory function

Saves the most recent light level value set

Load detection for R, L and C loads

For controlling ventilation systems

Convenient snooze function

Lets you glide gently into the realm of dreams

Adjustable dimming response

For ideal dimming of LEDs

Password protection possible

Prevents unauthorised access to your devices

App for Android and iOS

Convenient operation via the app

Safety first

The switch-off pre-warning of the DIMAX 544 plus P does not leave you standing in the dark in the staircase, but warns you by gently dimming the light.

Safety first

The switch-off pre-warning of the DIMAX 544 plus P does not leave you standing in the dark in the staircase, but warns you by gently dimming the light.

Custom lighting scenarios

Conveniently configured and activated via smartphone

Adjustable staircase light function

Convenient operation via the app

Long range. Easy programming.

Activate the desired lighting scenarios conveniently via your smartphone. The MAXplus app is available for Android and iOS.

Time and light control

Dimmer

DIMAX 532 plus

DIMAX 534 plus

Description

Common functions

- Universal dimmer for R, L and C loads with automatic load detection
- Switch-on brightness can be saved individually
- Adjustable minimum brightness (required for ESL and LED)
- Multi-voltage input, e.g. for intercoms
- Low stand-by consumption
- Memory function in the event of power failure
- Automatic electronic overload and overheating switch-off
- Dimming switch-on function

- Permanent ON function (test function)
- No minimum load requirement
- Soft ON and Soft OFF protects the light
- The dimming output can be upgraded by using additional dimmboosters „DMB 1 T KNX“ - dimming output 300 W/VA for each dimmbooster

DIMAX 534 plus

- Comfort setting with wake-up and snooze function (can be deactivated), e.g. for children's bedrooms
- Adjustable dimming rate (with automatic functions)

- One and two button operation for ease of use
- Up to 3 light scenes can be called up via separate input (diode module required for more than one light scene)
- Central OFF/ON or light scene for up to 10 devices possible with one push button
- Staircase light function with dimming function in accordance with DIN 18015-2 (resettable, long-time function)
- Can be controlled by push buttons or switches e.g. for combination with presence detectors or time switch

Time and light control

Dimmer

Description

Common functions

- Universal dimmer for R, L and C loads with automatic load detection
- Optimised settings for LEDs, incandescent lamps
- Easy installation thanks to a highly compact housing
- Ideal for all dimmable LEDs and halogen lamps
- Memory function saves the most recently set light level value and then dims to this value the next time it is switched on
- Convenient snooze function

DIMAX 541 plus E

- Push button operation

DIMAX 542 plus S

- Push button operation, setting via potentiometer
- Adjustable minimum brightness for LEDs
- „Gentle“ lamp-conserving function for switching on and off
- Automatic detection of the load type
- Overheating protection against overload
- Short-circuit protection

DIMAX 544 plus P

- Operation by button or app via Bluetooth Low Energy
- Adjustable minimum brightness for LEDs
- Adjustable dimming response
- Adjustable staircase light function
- App for Android and iOS
- Special load setting
- Sequential scenes
- Password protection possible
- „Gentle“ lamp-conserving function for switching on and off
- Automatic detection of the load type
- Overheating protection against overload
- Short-circuit protection

Easy operation via app (DIMAX 544 plus P)

LUNA top3 – Daylight-based adjustments

Now possible via a smartphone app

The new LUNA top3 digital twilight switches from Theben are reaching new heights in terms of functionality, programmability and energy efficiency. Twilight programmes can be easily controlled using an app and transferred to the twilight switch via Bluetooth Low Energy. Thanks to the newly developed zero-cross switching, you can keep the high inrush currents of LEDs firmly under control. top3 can handle 5 times more LED power than top2 (max. 600 W/ 800 A/200 μ s).

Practical, reliable and low-maintenance: Channel switching and locking

The new dual-channel LUNA 122 top3 twilight switch now offers a channel switching and locking feature. The channel switching option allows you to activate basic lighting while at the same time saving energy. For example, this can ensure even loads for street lighting while also increasing the maintenance intervals and life of the lamps. The channel locking feature prevents a channel from using conflicting commands which could damage connected devices (e.g. forward and return for motors).

Special programmes with yearly functions

The new LUNA 121 top3 and LUNA 122 top3 twilight switches feature a small annual program so that you can program one-off and recurring events (e.g. pre-programmed holidays which you need only select).

Maximum security against tampering

Time switch programs can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged into the timer. This protects your device against unwanted access by third parties and ensures maximum security against tampering. This is particularly important for devices installed in public places.

For technical details, see page 300 onwards.

LUNA 108 plus

LUNA 110 plus

Description

Common functions

- Analogue twilight switch
- External light sensor included in delivery
- Display of channel and switching status
- Infinitely adjustable switching brightness

LUNA 108 plus

- Fixed On and Off switching delay

LUNA 110 plus

- Adjustable On and Off switching delay
- DuoFix spring terminals
- Extended brightness levels and adjustable delay
- Five adjustable brightness levels for simple setting of lux value

- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- Permanent OFF and permanent ON function can be set on the potentiometer
- Test function

LUNA 111 top3

LUNA 112 top3

Description

Common functions

- Twilight switch/light controller
- External light sensor included in the scope of supply
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy with OBELISK top3
- Maximum security against tampering, time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged in
- Switching brightness digitally adjustable
- Adjustable on and off switching delay
- Switching brightness and switching delay can be set separately for switching on and off
- Onscreen display of channel and switching status as well as current lux value

- DuoFix load line connections
- Zero-cross switching for relay-saving switching and high lamp loads
- Up to 4 sensors can be attached
- Up to 10 devices can be connected to a digital sensor
- Interface for OBELISK top2 memory card (PC programming)
- Extended brightness range
- Permanent ON/OFF switching
- Test function
- Switching pre-selection
- Display lighting
- PIN coding
- Hour counter

Time and light control

Twilight switches, Wall installation or mast bracket

Description

Common functions

- Twilight switch with integrated light sensor
- Cable feed from the back and from below
- Captive screws
- Large terminal area
- Brightness value can be set without opening the device
- Large light exposure angle (approx. 180 degrees)

LUNA 126 star E

- Fixed On and Off switching delay
- Infinitely adjustable switching brightness

LUNA 127 star S

- Adjustable On and Off switching delay
- Infinitely adjustable switching brightness
- Test function
- Teach-in function
- Timer function (1 hour on)
- Switchable brightness range: 2-100/100-2000 lux

Absolute classics! Hour counters

Our tried-and-tested counters are very quick to install and can be used to record operating and service times reliably. In turn, this allows precise planning and monitoring of your production processes, maintenance cycles and warranty periods.

Time and light control

Time relays

Description

Common functions

- Electronic time relay
- Can be used universally for controlling automatic processes in machines, lighting, ventilation, heating, cupboards etc.
- Precise analogue time setting
- Multi-voltage input for all supply and control voltages, no jumpers or additional terminals are required

- LED to display the switching status

TM 345 M

- Locking snap switch to select the period of time, as well as the following operating modes:
 - Response delay (AV), without control contact
 - Wipe contact (EW), without control contact
 - Release delay (RV), with control contact
 - Pulse former (IF), with control contact

- Response and release delay (VZ), with control contact
- Pulse output (WR), with control contact
- Flip-flop (TG)

TM 345 B

- With flip-flop function
- Pulse and break time independently adjustable

Hour counters, analogue, front panel and DIN rail

Description

Common functions

- Hour counter with synchronous motor drive

BZ 142-1

- Front panel devices with click-in or stretch clamp supports for walls up to a maximum of 10 mm thick
- Clamp or flat plug connection 6.3 mm
- Versions for direct voltage with quartz-controlled stepper motor
- Progress display

BZ 142-3

- With plug-in base for wall installation (terminal cover required)
- Plug-in base with quick fastening for 35 mm profile rails (DIN EN 60 715)
- Screw terminals
- Contact protection to comply with accident prevention regulation BGV A3
- Housing colour: anthracite
- Versions for direct voltage with quartz-controlled stepper motor
- Progress display

BZ 143-1

As BZ 142-1

BZ 145

- Built in distributor device with quick fastening for 35 mm profile rails (DIN EN 60 715)
- Top mounting with additional terminal box cover plate, sealable
- Control panel installation with assembly kit No. 907 0 001
- Contact protection to comply with accident prevention regulation BGV A3
- Captive screw terminals

RAMSES 814 BLE UP

Conveniently controlled from your smartphone

 Bluetooth®

The new RAMSES 814 BLE UP clock thermostat by Theben is the first invisible clock thermostat (heating or cooling). It is completely hidden in the flush-mounted box, under the blind cover or the box lid.

This clock thermostat can be controlled and programmed via an app, is really easy to use and can be quickly adapted to different user prompts. A direct Bluetooth Low Energy (BLE) connection is established between the app and the RAMSES 814 BLE UP. This impresses with its ability to measure and control the temperature accurately while consuming only minimal power. No additional components are necessary, making it an attractively priced product with no hidden costs.

Convenient operation

Fiddly buttons and basic operating displays are a thing of the past. The RAMSES 814 BLE UP is conveniently operated using smartphones and tablets with a high-definition colour touch screen.

Maximum security against tampering

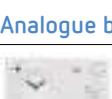

The RAMSES 814 BLE UP only needs a local Bluetooth connection to work in your home. There is no need for an Internet connection or any additional gateways or routers. A clear advantage in terms of security against tampering.

Easy to install

In contrast to other smart thermostats, the RAMSES 814 BLE UP does not need any additional components (gateways, switch actuators, etc.). Install the RAMSES 814 BLE UP just like a conventional clock thermostat: quickly, easily and without fuss. And the best thing of all: with the RAMSES 814 BLE UP, no data is stored in the cloud.

Climate control

Clock thermostats, Digital 230 V

RAMSES 812 BLE

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Mains version
- Suitable for energy-saving room temperature control in houses, apartments, etc.
- Operation via app
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- Intelligent control algorithm (pulse-duration controller, hysteresis controller)
- Suitable for on/off heating systems, zone-based or single-room control, electric heating units

Product selection

Connection type	Program	Setting range temperature	Type	Article number
3-/4-wire	Weekly program	+2 °C to +30 °C	RAMSES 812 BLE	8120150

Technical data

RAMSES 812 BLE			
Operating voltage	230 V AC, 50 Hz	Program	Weekly program
Controller type	Hysteresis or pulse-duration controller	Number of memory locations	42
Switching capacity	8 (1) A/250 V AC	Power reserve	4 hours
Setting range temperature	+2 °C to +30 °C	Type of protection	IP 20
Connection type	3-/4-wire (230 V + switching output)	Protection class	II in accordance with EN 60730-1

Accessories

Temperature sensor RAMSES IP 65

Climate control

Clock thermostats, Digital 230 V

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Suitable for energy-saving room temperature control in houses, apartments, etc.
- Operation via app
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- Power supply via OpenTherm bus (clock thermostat)

RAMSES 816 BLE

- Mains version (control box)
- Relay switch output at the control box (floating, 10 (1) A)
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- Replaces 2-wire controller in the room when the lower housing is fitted next to the heating
- Suitable for switching higher currents (relay in lower housing) for electric heating units
- Suitable for on/off heating systems, zone-based or single-room control, for higher switching capacities with control box, and for 2-wire connection (for replacing 2-wire battery devices)

RAMSES 816 BLE 2

- Power supply via OpenTherm bus (clock thermostat)
- Mains version (control box)
- Relay switch output at the control box (floating, 5 A) for heating ON/OFF
- Special function for device reset, relay closes briefly for time adjustable in seconds
- Modulation output 0-10 V
- Suitable for heaters with 0-10 V modulation input
- Suitable for heaters with device reset, input or master reset

RAMSES 816 BLE 3

- Power supply via OpenTherm bus (clock thermostat)
- Mains version (control box)
- 1 x relay 10 A floating, 1 x relay 5 A, floating, for heaters with 2-stage regulation
- Hysteresis adjustable between stage 1 and stage 2, (temperature difference between room ACTUAL and room SETPOINT value adjustable from 0.5 °C to 2.5 °C in 0.5 °C steps)
- Heating and cooling function possible
- Heating from 20 °C downwards with relay 1
- Cooling start temperatures (range 20-30 °C)
- Waiting time adjustable for change over between heating and cooling (1-50 h)

Clock thermostats, Digital battery version

RAMSES 811 top2

RAMSES 831 top2

Description

Common functions

- Digital clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Battery version
- Suitable for energy-saving room temperature control in houses, apartments, heating zones, offices, showrooms, factories, medical practices, holiday homes
- Temperature is set quickly via rotary switch
- INFO key for viewing important settings
- Quick start-up via 3 basic programs with individually changeable comfort and reduced temperature
- Party / ECO program
- Fully automatic summer / winter-time correction
- Holiday program with reduction phase or date-controlled heating phase for holiday homes
- Different control types can be individually set
- Optimum start option thanks to operating point and switching differential setting option
- 24 programmable time phases per program also enable reduction phases during the day
- Plug-in base for wall or flush-mounted socket installation

RAMSES 831 top2

- Backlit display through keystroke
- External input for connection of presence detectors, temperature sensors, floor sensors, window contacts or telephone remote switches
- Optimisation function for automatic correction of heating start up

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Zone control, 1 zone
- 1 external temperature sensor required
- Daily/weekly program can be set to the minute
- Date-controlled holiday program
- Programming displayed graphically by a bar arrangement in the LCD
- Fully automatic summer/winter-time correction
- Manual switching pre-selection and operation mode selector for: Automatic mode, comfort mode, reduction mode, frost protection mode
- PIN coding
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (Copying of programs)

Clock thermostats, Digital battery version

Description

Common functions

- Radio-controlled system for room temperature control
- The system consists of one digital clock thermostat and one receiver
- Suitable for energy-saving room temperature control in houses, apartments, heating zones, offices, showrooms, factories, medical practices, holiday homes
- Required temperature set via the rotary dial
- INFO key for viewing important settings
- Quick start-up via 3 basic programs with individually changeable comfort and reduced temperature
- Party / ECO program
- Automatic summer/winter time adjustment
- Different control types can be individually set

- Optimum start option thanks to operating point and switching differential setting option
- 24 programmable time phases per program also enable reduction phases during the day
- 2 comfort and 2 reduced temperatures can be allocated to each phase
- Including base for free choice of position
- An optionally available plug-in base is required for wall installation
- Holiday program with reduced temperature or date-controlled heating phase
- Optional pump protection function
- Optional feature to warn when boiler maintenance required

RAMSES 813 top2 HF Set A

- Consisting of a RAMSES 813 top2 HF and a REC 11 receiver with an NO contact 16(2) A/250 V AC for wall mounting

Climate control

Clock thermostats, OpenTherm

Description

- Digital heating control for time-dependent monitoring and control of room temperature
- Open Therm heating controller for 2 or 3 point control, weather-dependent, service water and circulation control
- Automatic sensor recognition for weather- or room-dependent control; can be switched manually at any time
- 3 different weekly programs
- 3 comfort and 2 reduced temperatures can be allocated to each phase
- INFO button for the most important data
- Additional switching program for domestic hot water utilisation times
- Adjustable service water storage temperature, programmable legionella protection
- Party/ECO program
- Chimney sweeping function with push button OT box
- Minimum boiler temperature can be set
- 2 heating curves can be set for 2 heating circuits
- 2-stage burner control option
- Holiday program with reduced temperature or date-controlled heating phase can be programmed e. g. for holiday homes
- USB interface for modem
- Automatic summer/winter time adjustment
- Boiler/feed temperature (control circuit 1) controlled by switching the burner
- Control of feed temperature (control circuit 2) via pump control or motor-controlled mixer
- 3-point controller with feed sensor
- Time- and temperature-dependent control of hot water circulation pump.
- Pump protection function
- Inputs: External sensor (contained in set), feed sensor heating circuit (contained in set), contact or immersion sensor for domestic hot water, contact sensor for circulation
- Elapsed-time counter for recording relay switching times e.g. burner operating time
- Adjustable reminder function for heater maintenance

Climate control

Clock thermostats, Analogue battery version, Analogue 230 V

RAMSES 784 S

Description

Common functions

- Analogue clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Segment program disc with daily program
- Normal and reduced temperature can be set separately
- Operating point and electronic recirculation are set from the front
- Party switch and program display

RAMSES 784 S

- Battery version
- Electronic temperature control
- Quartz mechanism
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C
- Battery monitoring with battery replacement indicator via flashing LED

- Silting and pump protection function (option)

RAMSES 722 S

- Mains version
- Synchronous motor drive
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

Climate control

Clock thermostats, Analogue battery version, Analogue 230 V

Description

Common functions

- Analogue clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Operating point and electronic recirculation are set from the front
- Party switch and program display

RAMSES 784

- Battery version
- Tappet program disc with daily or weekly program
- Electronic temperature control
- Normal and reduced temperature can be set separately
- Quartz mechanism
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C
- Battery monitoring with battery replacement indicator via flashing LED
- Silting and pump protection function (option)

RAMSES 722

- Mains version

- Tappet program disc with daily or weekly program
- Synchronous motor drive
- Normal and reduced temperature can be set separately
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 782

- Mains version
- Tappet program disc with daily or weekly program
- Quartz mechanism, 3 day power reserve
- Normal and reduced temperature can be set separately
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 721

- Mains version
- Tappet program disc with daily program

- Synchronous motor drive
- Normal temperature can be set
- Reduced temperature approx. 5 K lower in relation to the set comfort temperature
- Without selector switch
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 725

- Mains version
- Tappet program disc with daily or weekly program
- Synchronous motor drive
- Reduced temperature can be set
- Central control of reduced temperature as per time program
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

AMUN 716 CO₂ Monitor

Get your ventilation right

Lots of people sharing a room can quickly produce poor air quality. This is mostly caused by exhaled carbon dioxide (CO₂). In turn, this lowers well-being, concentration and performance.

The classification system used by the German Environment Agency for inhaled air quality

CO ₂ content in the room	Hygiene assessment	Recommendations
< 1000 ppm	Hygienically acceptable	No further measures required
1000 to 2000 ppm	Serious cause for concern	Ventilation measures, check and improve ventilation habits
> 2000 ppm	Hygienically unacceptable	Check that the room can be properly ventilated; implement further measures if applicable

The reliable way to measure CO₂ concentration levels

Theben CO₂ sensors monitor CO₂ concentration levels in schools and classrooms, in offices and meeting rooms or in passive and low-energy buildings. CO₂ sensors thereby make a decisive contribution to room air quality.

Mobile CO₂ sensor with USB cable for measuring air quality

Suitable for schools/nurseries, offices, conference and meeting rooms, and rooms in homes

In the event of a potentially dangerous CO₂ concentration, the device gives a visual warning via the LED traffic light indicator so that the ventilation can be optimised to create a healthy room climate.

A compact solution to improve air quality: thePrema P360 KNX AP Multi WH presence detector with CO₂ sensor

Integrated CO₂ sensor!

For technical details, see the KNX section on page 88.

With its integrated CO₂ sensor, the thePrema P360 KNX Multi presence detector from Theben not only detects the presence of people, but also the CO₂ concentration in the room. Good room air quality and regular ventilation of enclosed spaces are more important than ever at the moment. In offices and classrooms in particular, constant measurement of the CO₂ concentration means that rooms can be ventilated in a targeted manner in order to minimise harmful aerosols and improve the air quality.

This is where the thePrema P360 KNX Multi from Theben comes in: the device combines a presence detector and a CO₂ sensor in one compact housing. People in the room are reliably detected and, at the same time, the CO₂ concentration is measured precisely. The ventilation is controlled efficiently via the KNX building automation system on the basis of easily configurable threshold values.

KNX multisensor

Consisting of KNX passive infrared presence detector and KNX room air sensor KNX (= 2 bus sharing units)

Measures CO₂ concentration, relative humidity, temperature and air pressure

Easy installation and integration into the KNX building automation system

As multiple devices are combined in one housing, there is only one unit to install. This reduces the amount of effort involved in installation considerably. In addition to its presence detection and CO₂ level functions, the unit also measures the relative humidity, temperature and barometric air pressure.

This allows further actions of the KNX-based building control system to be triggered with a single unit. Practical: Existing thePrema KNX presence detectors can be upgraded easily and cost-effectively.

KNX AP Multi WH basic set
for retrofitting into existing KNX detectors
of the following types:
thePrema S/P KNX UP WH

Climate control

CO₂ sensors

Description

- Mobile CO₂ sensor with USB cable for measuring air quality
- Suitable for schools/nurseries, offices, conference or meeting rooms and living spaces
- The device warns optically via the LED traffic light system in case of a potentially dangerous CO₂ concentration - so ventilation can be optimized immediately and a healthy room climate can be created
- Green threshold value: Up to 1,000 ppm CO₂, hygienically ok, everything is in the green range!
- Threshold value orange: Up to 2,000 ppm CO₂, hygienically noticeable, Aeration - good idea!
- Threshold value red: Over 2,000 ppm CO₂, hygienically unacceptable, Ventilation is an absolute must!
- Fresh air must be supplied and the used air removed at latest when the red threshold value is reached
- Includes USB cable for easy setup
- Stand and non-slip pad included, alternative wall mounting is also possible
- Development based on the recommendation for CO₂ in indoor air of the Federal Environment Agency according to various guidelines, e.g. the Bavarian „Guideline for the Promotion of Investment Costs for Technical Measures for Infection-Protection-Compatible Ventilation in Schools (FILS-R)

Climate control

CO₂ sensors

Description

- CO₂ sensor
- Suitable for conference and meeting rooms, offices, schools/nurseries, passive and low-energy housing.
- For fan control
- Warning display for CO₂ concentration (lights)
- Power unit optionally available. Power unit is suitable for flush mounted installation
- Simple upgrade of uncontrolled ventilation systems possible
- 2 switch outputs CO₂ controlled for 2 stage control, with manual and automatic mode as well as display of switching status
- 3 x 0–10 V outputs for CO₂, temperature and relative humidity

Climate control

Room thermostats, Mechanical

Description

Common functions

- Room temperature controller with thermal feedback
- Suitable for all types of heating, e.g. gas, water, electric heating with central/individual room control
- Setting controller with mechanical setting limit or detection

RAMSES 702

- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 703

- Internal setting: Temperature cannot be set externally. Temperature is set inside the device at start-up

- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 704

- Switch for additional heating ON/OFF + indicator lamp

RAMSES 705

- Switch for heating ON/OFF

RAMSES 706

- Switch for heating ON/OFF + indicator lamp
- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 707

- Switch for heating ON/OFF

- Switch for additional heating ON/OFF + indicator lamp

RAMSES 708

- Also suitable for air conditioning equipment
- Heating/cooling changeover contact

RAMSES 709

- Also suitable for air conditioning equipment
- Heating/cooling changeover contact
- 3-way selector switch for: comfort mode, reduction mode, external reduction
- Indicator lamp
- External temperature reduction (approx. 4 K) possible via control with time switch

Room thermostats, Mechanical

Description

Common functions

- Room temperature controller with thermal feedback
- Central part fits nearly all frames using an adapter frame from the switch manufacturer
- Ideal controller for refurbished and new build properties

RAMSES 741

- Supplied as replacement device without frame, central part and setting button
- Frame, central part and setting button available as accessories

RAMSES 746

- Switch for heating ON/OFF + indicator lamp
- Supplied as replacement device without frame, central part and setting button
- Frame, central part and setting button available as accessories

RAMSES 748

- Heating/cooling two-way switch
- Supplied as replacement device without frame, central part and setting button
- Frame, central part and setting button available as accessories

RAMSES 741 RA

- With frame, central part and setting button

RAMSES 746 RA

- With frame, central part and setting button
- Switch for heating ON/OFF + indicator lamp

Climate control

Room thermostats, Electronic

Description

RAMSES 714

- Electronic room thermostats for all types of heating, e.g. gas, water, electric heating etc.
- Individual room control possible in combination with Theben actuators
- Heating status display via LED
- External temperature reduction (approx. 3.5 K) is possible via control with time switch. Temperature reduction can be cut to 2 K by opening a wire bridge

RAMSES 714 A

As RAMSES 714, but:

- External temperature sensor for underfloor heating (wet rooms or bathroom heating)
- Switchable for the connection of available NTC sensors (33 K Ω /25 °C)
- Switch for heating ON/OFF

RAMSES 751 RA

- Electronic room thermostat with remote temperature sensor for underfloor heating control

- Display of temperature reduction and heating ON
- 2-pole mains switch for heating ON/OFF
- Emergency mode for sensor malfunction at 30 % heating
- Central part fits nearly all frames using an adapter frame from the switch manufacturer

Product selection

Type of connection	Type of contact	Switching capacity at 230 V AC	Setting range temperature	Installation type	Type	Article number
2/3-way conductors	NC contact	8 A (at 230 V AC, cos φ = 1)	+5 °C ... +30 °C	Surface-mounted	RAMSES 714	7140002
4/5-way conductor	NC contact	16 A (at 230 V AC, cos φ = 1)	+10 °C ... +60 °C	Surface-mounted	RAMSES 714 A	7140016
5-way conductor	NO contact	16 (4) A	+10 °C ... +50 °C	Flush-mounted	RAMSES 751 RA	7510131

Technical data

	RAMSES 714	RAMSES 714 A	RAMSES 751 RA
Operating voltage	230 V AC		
Frequency	50 Hz		
Type of contact	NC contact		NO contact
Switching output	Not potential-free		Potential-free
Switching capacity	8 A (at 230 V AC, cos φ = 1)	16 A (at 230 V AC, cos φ = 1)	16 A (at 230 V AC, cos φ = 1), 4 A (at 230 V AC, cos φ = 0.6)
Setting range temperature	+5 °C ... +30 °C	+10 °C ... +60 °C	+10 °C ... +50 °C
Control accuracy	\pm 0.25 K		\pm 0.5 K
Control behaviour	-		Proportional controller with PWM (continuous type)
Colour	Pure white (similar to RAL 9010)		
Installation type	Surface-mounted		Flush-mounted
Max. cable length	-	Length 4 m, \varnothing 6 mm, (IP 54)	Length 4 m, \varnothing 6 mm, extendable to 50 m
Ambient temperature	-		+0 °C ... +40 °C
Type of protection	IP 20		IP 30
Protection class	II according to EN 60 730-1

Accessories

	Description	Suitable for	Type	Article number
	Wall mounting kit 17,5 mm - Terminal box cover plate for assembly, sealable	- All DIN rail installation devices - width 1 module	Wall mounting kit 17,5 mm	9070065
	Wall mounting kit 35 mm - Terminal box cover plate for assembly, sealable	- All DIN rail installation devices - width 2 modules	Wall mounting kit 35 mm	9070064
	Wall mounting kit 52,5 mm - Terminal box cover plate for assembly, sealable	- All DIN rail installation devices - width 3 modules	Wall mounting kit 52,5 mm	9070050
	Wall mounting kit 70 mm - Terminal box cover plate for assembly, sealable	- All DIN rail installation devices - width 4 modules	Wall mounting kit 70 mm	9070049
	Terminal cover 52,5 mm - Terminal box cover plate for assembly, sealable	- SUL 188 g - SUL 188 hw	Terminal cover 52,5 mm	9070061
	Front panel kit - The front panel installation set is suitable for Theben distributor installation devices of 17.5 to 107.5 mm width - Walls from 1 to 5 mm thick	- All DIN rail installation devices	Front panel kit	9070001
	Snap-on mounting 72 x 72 - Quick fastening for 35 mm DIN-rail	- All devices for front panel/wall installation	Snap-on mounting 72 x 72	9070071
	PC set OBELISK top2/3 - Switching programs created on the PC by means of the convenient OBELISK top2/3 software can be transferred via USB interface to the OBELISK top2 memory card and from the card to the time switch and vice versa. Thus no PC or laptop is required on-site. Programming and the program printout can be done comfortably from the desk - For Windows Vista/7/8/10 (32/64 Bit) - Consisting of: Memory card, USB plug adapter, software - Updates of existing OBELISK top2 software are available as free downloads at www.theben.de	- TR top2 - TR top3 - LUNA top3 - SELEKTA top2 - SELEKTA top3 - TR top2 KNX	PC set OBELISK top2	9070409

	Description	Suitable for	Type	Article number
	Bluetooth OBELISK top3 - Bluetooth low-energy dongle for the transfer of switching programs and direct commands from the app to the time switch - Maximum manipulation security, Time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch - Low consumption on standby compared with permanently installed Bluetooth components	- TR top3 - SELEKTA top3 - LUNA top3	Bluetooth OBELISK top3	9070130
	Memory card OBELISK top2 - Individual memory card	- TR top2 - LUNA top2 - LUNA top3 - SELEKTA top2 - TR top2 KNX	Memory card OBELISK top2	9070404
	Antenna RC-DCF - Radio control via DCF antenna with top2 RC devices: To ensure good reception, do not install the antenna in cellars or on distribution boxes. Connection is made via separate 2-wire, unshielded high-voltage power cable (max. 100 m), up to 10 Theben top2 RC devices can be connected. Polarity, short-circuit and interruption of the antenna circuit are each visually displayed to help with installation.	- TR top2 RC - TR top3 RC - LUNA top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-DCF	9070410
	Antenna RC-GNSS - Worldwide time synchronisation and positioning via receiving GPS satellite signal - The antenna is connected by a 2 wire cable (max. 100 m) to Theben top2/3 RC devices (up to 5 devices can be connected depending on device type) - Positioning is only possible when connecting to TR 641 top2 RC, TR 642 top2 RC, TR 644 top2 RC and SELEKTA 171 top2 RC devices - Can not be used with TR 611 top2 RC 24 V and SELEKTA 171 top2 RC 24V	- TR top2 RC - TR top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-GNSS	9070823
	Antenna RC-GNSS R - As antenna RC-GNSS, but: - Rugged encapsulated housing - Impact resistance IK 8, protection degree IP 65	- TR top2 RC - TR top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-GNSS R	9070807
	Cover 55 x 55 for BZ - Cover for hour counter	- BZ 142-1	Cover 55 x 55 for BZ	9070041
	Cover 72 x 72 for BZ - Cover for hour counter	- BZ 142-1	Cover 72 x 72 for BZ	9070074

	OT-Box Standard - For expansion of the RAMSES 856 top2 OT system	- RAMSES 856 top2 OT	OT-Box Standard	9070712
	Flow temperature sensor RAMSES - Also required for applications with 2 feed sensors	- RAMSES 816 top2 OT - RAMSES 856 top2 OT	Flow temperature sensor RAMSES	9070371
	External temperature sensor RAMSES - Type of protection IP 65	- RAMSES 816 top2 OT	External temperature sensor	9070463
	Plunge sensor RAMSES - Additionally required for applications with domestic water control or boiler plunge sensor	- RAMSES 816 top2 OT - RAMSES 856 top2 OT	Plunge sensor RAMSES	9070379
	Flush-mounted temperature sensor - Temperature sensor for flush-mounting - Compact design for easy installation in switch / distribution boxes - For use in combination with various KNX products	- Flush-mounted actuators	Flush-mounted temperature sensor	9070496

Accessories

	Description	Suitable for	Type	Article number
	Actuator ALPHA 5 230 V - Actuator for radiators, heating circuit distributors or individual heating circuits - Operating voltage 230 V AC - For opening and closing of valves in the fields of heating, ventilation and air conditioning - The actuator control is by a room thermostat with two-point output or pulse-width-modulation - Inrush current: < 550 mA for max. 100 ms - Dimensions: 48,4 x 44,3 x 52,2 mm - „First open function“ for easy installation and heating start-up - Plug-in installation on valve adapter to suit the most common valve bottoms and heating circuit distributors - Normally closed (Valve is closed when the operating voltage is cut) - Simple snap-on mounting to a valve adapter - Valve adapter not included in delivery - 100 % protection against damaging drives through leaking valves - Function and adjustment checking - Installation vertical, horizontal and up-side-down possible - Up-side-down position may reduce product life through special circumstances (e.g. contaminated water) - Protection against disassembly by means of removable SaveGuard - Guaranteed overvoltage protection	- All clock thermostats - RAMSES 701–709 - RAMSES 741–748 - RAMSES 714 - RAMSES 751 - HMG 6 T - HME 6 T KNX - HM 6 T KNX - HM 12 T KNX	Actuator ALPHA 5 230 V	9070441
	Actuator ALPHA 5 24 V As Actuator ALPHA 5 230 V, but: - Operating voltage 24 V AC/DC - Inrush current: < 300 mA for max. 2 min.	- All clock thermostats - HMG 6 T - HME 6 T KNX - HM 6 T KNX - HM 12 T KNX - HMT 6 S KNX - HMT 12 S KNX	Actuator ALPHA 5 24 V	9070442
	Valve adapter VA 80 - Valve adapters for Onda, Schlösser(from 1993), Oventrop (M 30 x 1.5), Heimeier, Herb, Therm-Concept, Frank, Roth (distributor), Dinotherm (distributor) - Other adapters available upon request	- ALPHA 5 230 V - ALPHA 5 24 V - CHEOPS control KNX - CHEOPS drive KNX	Valve adapter VA 80	9070437
	Valve adapter VA 78 - Valve adapters for Danfoss RA - Other adapters available upon request	- ALPHA 5 230 V - ALPHA 5 24 V - CHEOPS control KNX - CHEOPS drive KNX	Valve adapter VA 78	9070436
	Frame RAMSES 74x - Frame for mechanical room thermostats - Without central part	- RAMSES 741 - RAMSES 746 - RAMSES 748	Frame RAMSES 74x	9070603
	Central part RAMSES 741/748 - Central part without switch section and setting button	- RAMSES 741 - RAMSES 748	Central part RAMSES 741/748	9070602
	Central part RAMSES 746 - Central part with switch section and setting button	- RAMSES 746	Central part RAMSES 746	9070601

	Description	Suitable for	Type	Article number
	Power unit CO₂-sensor - 24 V/12 W flush-mounted power unit (SELV)	- AMUN 716 R	Power unit CO ₂ -sensor	9070494
	Contact temperature sensor - Contact temperature sensor in the cover flap housing for measuring the temperature at pipes and curved surfaces	- TA 4 S KNX - TA 6 S KNX - TA 8 S KNX	Contact temperature sensor	9070489
	Mast mounting S - For mast or corner installation of max. 2 weather stations Meteodata, LUXOR or LUNA - Diameter 48–60 mm	- LUXOR 440 - LUXORliving M140 - Meteodata KNX - LUNA 131 S KNX - LUNA 133 KNX	Mast mounting S	9070928
	2-way mounting plate ION - For the mounting of two ION push-button sensors on a standard double socket (standard combination distance 71 mm)	- ION KNX - LUXORliving ION	2-way mounting plate ION	9070822
	4-way push button module - 4-way push button module with integrated temperature sensor - For use with the TU 4 RF KNX / LUXORliving T4 RF and TA 6 S KNX - Cover frame included - Adapter frames for integration in common switching ranges available as accessory	- TU 4 RF KNX - TA 6 S KNX - LUXORliving T 4 RF	4-way push button module	9070806
	Power unit 24 V DC - Power pack for supply voltage from PHARAO controllers and sensors. Power unit sufficient for 5 x PhARAO-II 14/15 or 4 x PHARAO-II 24/25 controls - Width: 3 modules	- Meteodata 24V KNX	Power unit 24 V DC	9079330

General Delivery and Sales Conditions

For use with companies (status 2016-09-01)

Preamble

All deliveries and services are based - also in the future - exclusively on the following conditions, even if we do not refer to them specifically in the individual case. Their validity can only be partly or totally excluded by express written agreement for an individual transaction. General terms and conditions, especially purchase conditions of the purchaser, shall not apply to our deliveries and services. We shall not be bound by these terms and conditions even if we do not object to them expressly in an individual case; we herewith object to them. Our General Delivery and Sales Conditions are regarded as accepted, at the latest with the acceptance of the goods or the service.

I. SCOPE OF DELIVERY OBLIGATIONS

1. Our offers are non-binding, even if made on the purchaser's request. A legally binding contractual relationship with the purchaser shall only be constituted once we have confirmed the order in writing, which may also be possible by fax, by letters created automatically without signature, or e-mail; the same applies to modifications or amendments to the contract. As far as scope, type and time of the delivery are concerned, our written order confirmation shall be binding.
2. We reserve the right to any modifications of construction, production and design of our products. Our catalogues and our product presentations published on the Internet are continually being updated. Any illustrations and drawings contained therein shall not be binding and shall not be part of the properties agreed upon. They neither represent any guarantee for durability nor quality.
3. The documents belonging to the offer, such as drawings, data sheets, figures, diagrams, files, etc., shall only be approximates where not expressly described as being binding. The documents shall remain our property; we reserve all rights to them. Without our written consent, they must not be disclosed to any third party and they must be returned to us at any time on request.
4. Call orders must be placed and accepted in due time and with the partial quantities agreed. In case of call orders where term, production batch quantities and release times have not been agreed, we shall be entitled to request a binding definition of the releases 3 months after the date of the order confirmation, at the latest. If the purchaser does not comply with this request within 3 weeks, we shall be entitled to grant him a last additional period of two weeks for doing so and when this additional period has lapsed as well, we shall be entitled to withdraw from the contract or to refuse delivery and claim damages. In any case, the entire quantity ordered in the call order has to be accepted and to be paid by the purchaser 18 months after the order, except when otherwise stipulated. If the contractual quantity should be exceeded by the individual calls, we shall be entitled to deliver the surplus, but not obligated to do so. We can charge for the excess at the prices valid at the time of the call or the delivery.

II. PRICE

1. All prices are quoted in EURO. The applicable value added tax shall be charged separately.
2. The prices quoted apply to delivery ex works, without insurance and packaging.
3. Surcharges and a recalculation of the agreed remuneration shall be admissible as far as they are necessitated by the circumstances, e.g. material costs, wage or energy cost increases, an increase of the public charges etc., and if the goods or services are to be provided later than 4 months after the contract date. In case of any other price increases, the purchaser shall be entitled to withdraw from the contract if the list price has been increased far more than the general costs of living. Any deliveries for subsequent orders that are placed after the date of the price adjustment shall be charged at the new prices without the purchaser being entitled to withdraw from the contract.

III. DELIVERY

1. The delivery term shall start with the dispatch of the order confirmation, but not before all details of the perfor-

mance of the order have been clarified and not before receipt of an agreed advance payment or provision of material; the delivery terms are always stated by us subject to our own supply by our suppliers. The delivery term shall be deemed to have been complied with when the delivery item has been dispatched or collected before the expiration of this term or when a ready-for-dispatch note has been issued in cases where the goods could not be dispatched or collected without our being responsible for this.

2. In case of force majeure or other events beyond our responsibility that would threaten the smooth processing of the order, in particular delivery delays of our suppliers, disturbances of traffic or operation, industrial disputes, shortage of materials or energy, we shall be entitled to withdraw, entirely or partially, from the contract or to postpone delivery without the purchaser being entitled to claim damages. The purchaser may request from us a statement specifying whether we want to withdraw or whether we want to fulfil the contract within an adequate period of time. If we do not make such a statement, the purchaser shall be entitled to withdraw from the contract. We shall not be liable for the events or circumstances referred to above even if they occur during an existing delay of delivery.
3. In case of a delivery delay for which we are responsible, the purchaser shall grant us an adequate grace period. Once this period has expired, the purchaser may claim damages and/or withdraw from the contract insofar as the goods have not been delivered or indicated as being ready for dispatch until the end of this period. The purchaser is not entitled to withdraw from the contract if delivery delay has not been caused by us.

4. The purchaser is only entitled to claim damages as a replacement for the services if the cause of the damage is based on intent or gross negligence on our part. This does not apply if it is a firm deal.

5. The delivery obligations and the delivery terms shall be suspended as long as the purchaser is in delay with acceptance of the goods or any other obligation, without our rights from the purchaser's delay being thereby affected, or without him exceeding the credit limit granted by us. In this case, the risk of accidental loss or accidental deterioration shall pass to the purchaser from the date he is in delay.

6. The delivery term originally agreed shall no longer apply if the order is modified with our written consent.

7. Adequate partial deliveries as well as deviations from the order quantities (max. +/- 5 %) shall be admissible if the purchaser can be reasonably expected to accept this and as long as the latter's interests are taken into account.

8. The weight and the number of pieces of the goods delivered determined by us shall be decisive for the invoicing.

IV. DISPATCH

1. The goods shall be dispatched at the purchaser's costs and risk from a location to be determined by us.
2. Unless the purchaser has submitted any special requests, we shall choose, at our own discretion, the packaging, as well as type and channel of dispatch. The additional costs for special wishes of the purchaser shall be borne by the latter. We shall not be obliged to choose the cheapest type of dispatch.
3. If the dispatch or the delivery is delayed upon the purchaser's request, we shall be entitled to set him an adequate period of time for accepting the goods and to demand immediate acceptance as well as a compensation for the damage caused by the delay once this period has lapsed.

V. TERMS OF PAYMENT

1. Payments shall be made in accordance with the conditions specified in our order confirmation.
2. The purchaser bears the costs for his payment, especially all kinds of banking charges and expenses.
3. Cheques shall be accepted only with the usual proviso. With any type of payment, the settlement date shall be the

day on which we can dispose over the amount due.

4. If a deferment of payment is granted or if the purchaser is in default with his obligations to pay, he shall, in the meantime, be liable to pay interests of 9 percent above the respective basic interest rate, without the need for a reminder notice. We reserve the right to claim further damages due to the delay. The purchaser reserves the right to prove that lower damages have been incurred. Furthermore, we are entitled to charge the purchaser a fixed rate of € 40.00 for the reminder.

5. The purchaser shall not be entitled to offset payments against any counter claims or rights unless his claims or rights are acknowledged by us, uncontested or final and absolute. The purchaser is not entitled to retain payments on account of disputed counterclaims either.

6. All our claims are due immediately if terms of payment are not adhered to, or we become aware of circumstances which appear to impair the creditworthiness of the purchaser. In this case, we are also entitled to supply outstanding consignments on cash-in-advance terms or security deposit, or to withdraw from the contract after a reasonable grace period and/or claim damages for non-fulfilment. In addition, we may prohibit the resale or processing of the goods delivered and request that the purchaser, at his costs, return the goods to us or assign the indirect possession of the goods delivered, and withdraw the authorization to collect claims pursuant to Section IX. 7. Already now, the purchaser agrees that we shall, in the mentioned cases, be authorized to enter into his premises and to take away the goods delivered.

7. Payments shall generally be set off against the oldest invoice that is due for payment. As long as an older invoice has not been paid, the purchaser is not entitled to discount on later invoices.

VI. COMPLAINTS AND NOTICES OF DEFECT

1. Complaints because of incomplete or incorrect delivery or notices of evident defects must be delivered to us in writing immediately, at the latest, however, within 2 weeks after receipt of the goods. Any other defects must be reported to us in writing immediately, at the latest, however, within 2 weeks after they have been detected. If we have not received the complaint or notice of defect in due time, any warranty claims of the purchaser shall be excluded. In case of defects reported in due time, the purchaser shall be entitled to the claims according to Section VII.

2. In case of damage in transit, the purchaser must procure an ascertainment of the damage by the railroad company, the postal service or the transport company.

3. If a part of the goods delivered is defective, the purchaser shall not be entitled to reject the entire delivery, unless the partial delivery is of no interest to the purchaser.

VII. WARRANTY

1. The purchaser's claims for supplementary performance shall be time-barred within 12 months from the statutory start of the limitation period. The same applies for withdrawal and diminution. This time limit does not apply if:
 - the law according to § 438 section 1 no. 2 BGB and § 634a section 1 no. 2 BGB requires longer time periods,
 - in case of intent,
 - in case of fraudulent concealment, and
 - in case of non-compliance with a quality guarantee.We shall be obliged, at our option, to eliminate any defects or make a replacement delivery if the delivery items are defective. The purchaser's reimbursement claims for expenses according to § 445a BGB shall also be time-barred within 12 months from the statutory start of the limitation period, provided that the last contract in the supply chain is not a consumer goods purchase. Any legal provisions regarding suspension of expiration, suspension and recommencement of the limitation period remain unaffected. Reimbursement claims against us according to § 445a BGB are only valid if the purchaser has not made an agreement with his customer which goes beyond the statutory claims for defects.

2. The purchaser shall grant us the time and opportunity that, in our equitable discretion, is required for the elimination of the defects. Any parts that are replaced shall become our property.

3. If the supplementary performance fails, if we let the adequate period granted to us for this purpose expire without making a new delivery or without eliminating the defect, or if subsequent performance is impossible or refused by us, the purchaser shall be entitled to withdraw from the contract or demand a reduction of the purchase price, the same shall apply to cases where we are unable to provide supplementary performance.

4. The warranty shall neither apply to defects and/or damage due to normal wear and tear nor defects and/or damage caused by inappropriate or negligent use, excessive stress, improper use, wrong handling etc. or circumstances that are not provided for in the contract unless the damage is due to our fault.

5. Without our consent, warranty claims may not be assigned to any third party.

6. We shall not be liable for any defects caused by improper modifications or repairs that are carried out by the purchaser or a third party.

7. Our liability for essential third-party products shall be restricted to the assignment of the warranty claims we are entitled to from the supplier of the third-party product unless satisfaction from the assigned right fails or the assigned claim cannot be enforced for any other reasons.

8. Unless otherwise provided below, any further claims of the purchaser against us, irrespective of the legal cause thereof, shall be excluded, in particular claims for the compensation of a damage that does not exist and/or occur in the goods delivered themselves (e.g. loss of profit, consequential damage or other economic losses); this exemption from liability shall not apply if liability is required by law because of deliberate action, gross negligence or a promise of guarantee or if an essential contractual obligation has been violated or in case of injuries to life and limb or health.

In case of negligent, but not grossly negligent violation, our liability shall be restricted to the replacement of the typical foreseeable damage.

9. The above provisions shall apply accordingly to the delivery of other goods than those agreed upon in the contract.

VIII. LIABILITY, PERIOD OF LIMITATION

1. The exclusion and the limitations of our liability for damages as set forth in Section VII. 8 shall apply accordingly to all cases of our liability for damages due to violation of contractual, or quasi-contractual obligations and tortious act. They shall not apply to claims pursuant to Paragraphs 1 and 4 of the Product Liability Law and to claims due to initial inability to perform at the point of conclusion of the contract or impossibility for which we are responsible. This exemption from liability shall not apply if liability is required by law because of deliberate action, gross negligence or a promise of guarantee or if an essential contractual obligation has been violated or in case of injuries to life and limb or health.

2. If our liability for damages is excluded or restricted, this shall apply in the same way to the personal liability of our executive bodies, employees or authorized agents.

3. The claims of the purchaser referred to in Sec. 1 shall become time-barred after 24 months, calculated from the end of the year of the passing of the risk. If the statutory period of limitation is shorter than 24 months, this statutory period shall be applicable to the relevant claims on the part of the purchaser. This reduction of the period of limitation shall not apply to claims for reasons of tortious act or product liability.

4. The statutory provisions concerning the burden of proof shall remain unaffected.

IX. RETENTION OF TITLE

1. All goods delivered (goods subject to retention of title) shall remain our property until all and any claims to which we are entitled because of the business relationship, in particular the outstanding balance claims, have been fully settled by the purchaser. This shall also apply when payments are made on specially designated claims.

2. If the goods subject to retention of title are combined with other goods by the purchaser, we shall acquire co-ownership of the new object pro rata of the invoice value of the goods subject to retention of title to the invoice value of the other goods used. If our ownership lapses due to a combination, the purchaser herewith agrees to assign to us his property rights to the new objects to the amount of the invoice value of the goods subject to retention of title and keeps them for us, free of charge. The resulting co-ownership rights shall be considered as goods subject to retention of title within the meaning of Section 1. We accept the assignment.

3. The purchaser may sell the goods subject to retention of title in the normal course of business at his terms and conditions only if these contain a comprehensive retention of title in accordance with the provisions set forth herein, and as long as he is not in default, provided that the claims from the resale pass to us pursuant to Sections 4. and 6. hereof. The purchaser does not have any other right of disposition of the goods subject to retention of title, in particular the authorisation to dispose of the goods subject to retention of title shall be automatically revoked if insolvency proceedings are applied for or liquidation commenced regarding the assets of the purchaser

4. The claims of the purchaser from reselling the goods subject to retention of title are herewith assigned to us. They serve as security to the same extent as the goods subject to retention of title. We herewith accept the assignment.

5. If the purchaser sells the goods subject to retention of title together with other goods not obtained from us, the assignment of claims from the resale shall only correspond to the amount of the invoice value of the goods subject to retention of title that are sold in the individual case. When goods in which we have a co-ownership share pursuant to Sec. 2. are sold, the claims shall be deemed to have been assigned corresponding to the value of this co-ownership shares.

6. If the purchaser uses the goods subject to retention of title for the execution of a contract for work, Sections 4. and 5. shall apply accordingly to the claims from this contract.

7. The purchaser shall be entitled to collect claims from sales according to Sections 3., 5., and 6. until this permission is revoked by us, which shall be admissible at any time. We will only make use of the right of revocation in the cases specified in Section 3., as well as V. 5. Any other assignment of the claims by the purchaser shall not be permitted. Upon our request, the purchaser shall be obliged to inform his customers immediately about this assignment to us – unless we do it ourselves – and to provide any information and documents required for the collection of claims to us. The purchaser is prohibited from hypothecation or transfer of the goods by way of security.

8. Our retention of title implies that, once all our claims have been fully paid, the title to the goods subject to retention of title shall ipso jure pass to the purchaser and he shall be entitled to the assigned claims without any restrictions. If the value of the existing securities exceeds the secured claims by more than 20 % in total, we shall be obliged to release securities accordingly, at our option, on request of the purchaser. The assessment of securities shall be based on their realizable value.

9. The purchaser shall inform us immediately about any seizure or any other threat or impairment to our ownership rights or claims by a third party and provide the bailiff's return or any other documents to us and he shall do anything within his power to protect our rights.

10. We shall be entitled at any time to enter into the warehouse and the business premises of the purchaser, in order to remove, separate or label the goods subject to retention of title. At our request, the purchaser shall provide any relevant information concerning the goods subject to retention of title and hand over the related documents. The purchaser, at his costs, shall be obliged to provide comprehensive insurance coverage for the goods subject to retention of title in our favour and to supply evidence thereof on request. He herewith assigns all claims from these insurances to us; we accept the assignment.

11. The assertion of our retention of title or the revocation of the authorizations granted herein shall not be considered as a withdrawal from the contract. The purchaser's right of possession in the goods subject to retention of title expires if he does not meet his obligations arising from this or another contract. We shall then be entitled to take possession of the goods subject to retention of title ourselves and to exploit them in the best possible way by means of a private sale or an auction, without prejudice to the payment obligations or any other duties of the purchaser. The proceeds thus realized shall be appropriated to the purchaser's outstanding payments after the costs have been deducted. Should there be any surplus, this shall be paid to the purchaser.

12. If the retention of title or the assignment is not effective under the law to which the goods belong, the corresponding security valid in this field of law shall be deemed as agreed. If the cooperation of the purchaser is required in this context, he shall take any measures that are necessary for the constitution and preservation of such rights.

X. TOOLS

1. Tools, moulds, appliances and the like - in the following referred to as "tools" - are in principle our assets, even if the purchaser had paid for these wholly or partially. This shall apply irrespective of whether the tools were manufactured by us or by commissioned third parties.

2. We undertake not to manufacture any parts for third parties using tools for which the purchaser has paid the entire cost, providing the purchaser supplies us with follow-up orders. This obligation expires without a claim for reimbursement of any type against us arising for the purchaser if we do not receive further orders within two years after the last order.

3. We shall store the tools in good condition free of charge. The purchaser shall bear the costs of maintenance and repairs. Our obligation to store the tools shall come to an end after expiry of the two-year period stated in Sec. 2. We shall be entitled to dispose of the tools afterwards.

4. The provisions above (Sections 1 to 3) shall not apply to tools for common and generally usable items.

XI. PROTECTIVE RIGHTS OF THIRD PARTIES

Insofar as we have to manufacture products on the basis of drawings, specifications, models, or samples given to us by the purchaser, the purchaser takes upon himself the responsibility of guaranteeing to us that the rights of third parties are not infringed upon. In case of violation, the purchaser will indemnify us in full from any claims by third parties and fully reimburse us for any resulting damages. If a third party claims its industrial property rights we are entitled to stop the manufacturing or delivering of the items immediately without checking the legal situation.

XII. MISCELLANEOUS PROVISIONS

1. The place of performance and jurisdiction for both parties under the contract is D-72401 Haigerloch, Germany. We are also entitled to file an action against the purchaser at the purchaser's general place of jurisdiction.

2. All legal relations between the purchaser and us shall be governed exclusively by law of the Federal Republic of Germany.

3. Should one or several of the provisions of these terms and conditions or the other contractual provisions be or become invalid, this shall not affect the validity of the remaining provisions. The invalid provisions shall be reinterpreted in such a way that the legal and economic purpose intended with them is achieved to the greatest possible extent. The same shall apply if, during the execution of the agreement, a gap in the agreement requiring an amendment becomes evident. The contracting parties undertake to replace the ineffective provisions immediately by legally valid provisions or to close the contractual gap.

4. We shall store the purchaser's data for the purposes of the contractual relationship.
